B. & H. QUALITY LAWN SEEDS

Your Lawn Should Have the Best

B. & H. SPECIAL LAWN SEEDS

green throughout the winter. One pound will seed 300 square feet of new lawn and can be sown any time during the spring or late summer months. Seeds sown in August will help choke out the wild grass that grow in a lawn during wet seasons.

Try B. & H. Special on your lawn and then you will be one of our Boosters. 1 lb. 70c; 2 lbs. \$1.25; 5 lbs. \$3.00; 10 lbs. \$5.75; 20 lbs. \$11.00; 100 lbs. \$52.50.

B. & H. KENTUCKY SHADY GRASS

This is a mixture of grasses suitable for shaded areas. All of the various seeds used are high in purity and germination and will under favorable conditions make a beautiful green sward in six weeks' time. The soil is more likely to become sour in shaded places than in open spaces, and it should be borne in mind that grass will not thrive well where the soil is sour. However, this acid condition can be corrected by applying hydrated lime at the rate of 100 lbs. for each 300 square feet. Our B. & H. brand of lawn and other seeds are positively your safeguard if you want the best. Prices: 1 lb. 75c; 2 lbs. \$1.35; 5 lbs. \$3.25; 10 lbs. \$6.00; 20 lbs. \$11.50.

KENTUCO LAWN SEEDS

This is a good mixture that will fully meet requirements of those who wish moderately priced lawn seeds. It is suitable for all open spaces and will give quick results. 1 lb. 50c; 2 lbs. 90c; 5 lbs. \$2.10; 10 lbs. \$4.00.

B. & H. TERRACE TURF

To provide for an increasing demand for a grass that will give satisfactory results on terraces and steep embankments, we have combined in this mixture quick-growing and deep-rooting varieties that are best suited for that purpose. 1 lb. 75c; 2 lbs. \$1.35; 5 lbs. \$3.25.

KENTUCKY BLUE GRASS

Kentucky is famous for this native grass which is fine for lawns and pastures. It is one grass that does well in many climates and affords a beautiful green turf the year around. The seed is slow to germinate, but when once started, it will spread and eventually completely cover the ground. It is unequalled for lawns and permanent pastures.

Our B. & H. Special is the quality that every one who buys Blue Grass Seed would like to have. However, there is not enough of this grade to any ways near supply the demand for Blue Grass Seeds and a great many are unwilling to pay for this quality, yet for lawn purposes it is really cheapest because it is the very choicest of the seed crop, being large, plump, heavy seed and unusually high in purity and germination. This grade is used in B. & H. Special Lawn Grass.

B. & H. SPECIAL KENTUCKY BLUE—1 lb. 75c; 2 lbs. \$1.40; 5 lbs. \$3.25; 10 lbs. \$6; 100 lbs. \$55.

FANCY KENTUCKY BLUE—1 lb. 50c; 2 lbs. 90c; 5 lbs. \$2.10; bushel (14 lbs.), \$5.75.

WHITE DUTCH CLOVER

A very hardy plant and one that is used in most lawn mixtures. ¼ lb. 20c; 1 lb. 75c.

B. & H. RED TOP

A quick growing grass suitable for lawns and pastures; is particularly adapted to moist soil. One pound for 300 square feet. 1 lb. 45c; 5 lbs. \$1.90; 10 lbs. \$3.60.

RYE GRASS

A splendid grass where quick growth is desired or for winter coverage; is deep rooting and holds well on terraces and embankments. Sow 2 lbs. to 300 square feet; 50 lbs. to the acre. 1 lb. 25c; 5 lbs. \$1.00; 50 lbs. \$9.00.

AMERICAN CREEPING BENT

A pure strain of Creeping Bent, well adapted for producing putting greens, or a smooth velvety lawn. 1 lb. \$2.50; 3 lbs. \$7.50.

ROUGH STALK MEADOW

Well adapted for shaded places, under trees, etc. Forms a fine sward where few other grasses can exist. Sow 1 lb. to 300 sq. ft. 1 lb. 85c; 5 lbs. \$4.50.

RED OR CHEWING FESCUE

Forms a close and lasting turf, especially adapted for dry sandy soil. It resists extreme drought and thrives well on poor soils. Sow 2 lbs. to 300 sq. ft. 1 lb. 60c; 5 lbs. \$2.25; 10 lbs. \$4.25.

Greetings

THE PHOTOS reproduced on this page show some of our friends and well wishers, who visited us December 10, 1927—"Opening Day of our Larger Store." We were kept very busy entertaining from 9 A. M. till 4 P. M. Motion picture films of the National Garden Bureau on Gardening, and Gilson Mfg. Co.'s films on Bolens Garden Tractors and Lawn Mowers in action were shown, as well as a few short comics. Prizes to the value of \$93.00 were drawn, orchestra music and a light lunch served, was part of the day's program, all of which being enjoyed by our visitors.

As this catalogue goes to press we are planning for a similar day on January 5, 1929, to be known as B. & H. New Year Gafganim, and are endeavoring to make it surpass the last in the way of Instructive Educational Helps on Gardening and Farming.

The above reproduction is a view of the crowd in our shipping room, which had been cleared of merchandise for the occasion, and where motion pictures were shown and lunch served. The Big Boy is Raymond Reinstedler just after having another coffee and doughnut. He declares both were fine.

A View Taken in Our Store and Salesroom.

The season just closed shows a very nice increase in our business over any previous year. We are very thankful to our customers for their patronage of the past. We expect to continue with our policy of square dealing and selling "only the best," and solicit your future patronage upon that basis.

Wishing all health, happiness and prosperity for the entire year of 1929,

Sincerely,

BUNTON & HUBER CO.

Information and Suggestions to Customers

All prices in this Catalog are those in effect January 1, 1929 and are, f. o. b. Louisville, except where otherwise noted, and subject to change without notice.

TERMS. All Field Seeds, Potatoes and Onion Sets are net cash and all orders for the same will be shipped collect unless cash accompanies order or unless sent by a customer who has an approved credit or reference is supplied.

POSTAGE. We pay postage on all packets, ounces, quarter pounds and pounds of Garden and Flower Seeds at prices named in catalog. Postage charged on larger amounts according to zone in which you live relative to Louisville. Consult parcel post rates below. Five pounds of seed, when packed for mailing, requires postage for six pounds. If postage is not sent with cash orders, it is our custom to reduce amount of order to pay postage. It is more satisfactory to include postage in your remittance.

C. O. D. ORDERS will not be sent unless at least one-fourth the price is remitted in advance. This is to show good faith on part of sender and to pay for return charges if not accepted.

HOW TO ORDER. First write name and address plainly in proper place. State the kind and amount of remittance and how you want the order shipped (mail, express or freight) and give the name of railroad. Specify exactly what you want as per names in catalog and carry out prices.

REMITTANCE. Post office and express money orders are preferred and orders can be filled promptly. Personal checks are accepted and goods shipped after returns on same are received.

SEED NON-WARRANTY. We use every possible care to have and send out seeds, bulbs and plants that we firmly believe to be as represented in this catalog. True to name and strong germination. However, owing to the climatic, soil and other conditions beyond our control,

BUNTON & HUBER CO. give no warranty, express or implied, as to description, quality, productiveness, or any other matter, of any Seeds, Bulbs or other goods sent out, and will not be in any way responsible for the crop.

HEALTHFUL GROWTH DEPENDS ON THE FOOD

B AND H

Lawn and Garden Grower

Will give that **Healthful** dark green **Color** and **Growth** to your
Lawn, Flowers, Vegetables and Shrubs

B. & H. LAWN AND GARDEN GROWER.—It is composed of bone meal, sheep manure, super phosphate, nitrate of soda, pulverized tobacco, potash and sulphate of ammonia. Not only does it supply the plant with food but adds humus to the soil making it pliable and easy for the roots to spread. It adds the healthful green color to lawns and gives rapid growth to flowers, bringing out the fullness of their size and color. B. & H. Lawn and Garden Grower works like magic in the vegetable garden. It makes quicker and larger growth, crispy and tasty vegetables and by adding healthful growth to the plants they will withstand disease and insects much better than stunted growth.

Healthful Growth.
B & H Lawn and
Garden Grower will do
the same for your
plants.

It is inexpensive, as a handful worked into the soil in a radius of 12 inches is sufficient for a tomato plant. Best results in vegetable gardens and flower beds may be obtained by working into the top soil after breaking up the ground $2\frac{1}{2}$ to 3 lbs. for each 100 square ft. before planting seeds, and then work into drills or hills an equal amount at time of planting. For shrubs loosen top soil in a radius as far as branches extend and work in from one to two handfuls depending on size of plant. On old lawns broadcast in early Spring at the rate of 10 lbs. for each 250 square feet. On new lawns work into top soil.

When there is a better fertilizer for Lawns and Gardens we will have it for sale.

Our B. & H. Lawn and Garden Grower is put up in convenient sizes. 5 lbs. 35c; 10 lbs. 60c; 25 lbs. \$1.10; 50 lbs. \$1.90; 100 lbs. \$3.50; 1,000 lbs. \$32.50.

ORDER B. & H. LAWN AND GARDEN GROWER WITH YOUR SEEDS

Washington Asparagus.

ASPARAGUS

CULTURE—Sow seed in drills about 18 in. apart early in Spring or Fall after soaking in warm water 1 to 2 hours. Thin plants out to 3 inches apart and give frequent thorough cultivation, keeping plants clean from weeds. Roots can be transplanted either at one or two years old either in the Fall or Spring. The roots should be transplanted into a permanent bed in the richest soil that you have, harrow and work very deep. Open a trench about 15 inches deep and put in about 8 or 9 inches of well rotted manure, cover it with a few inches of soil and then place the root with the crowns facing one way about 12 inches apart and cover with 4 inches of soil, rows 5 feet apart. The growth should be cut in the Fall of the year and a top dressing of stable manure should be applied, this to be worked into the soil in the very early spring. It is also advisable to sprinkle a little salt over the bed. Only light cuttings should be made the second year. After the cutting season is over it is advisable to spray with a combination of Bordeaux and Arsenate of Lead which will prevent rust and also kill the Asparagus Beetle.

100 roots will set a row about 150 feet. An ounce of seed will plant a row about 50 feet long. 2 lbs. to the acre.

MARTHA WASHINGTON. A variety practically free from rust and other diseases, but is also larger and more vigorous. It grows large, straight shoots. It has a tight pointed bud and does not branch out until well beyond the time for cutting. This variety is especially adapted for market purposes, also very fine for home gardens.

PALMETTO. An old standard variety for all purpose. It is a vigorous growing dark green variety with pointed tips and very early.

BROCCOLI

CULTURE—Same as Cauliflower.

WHITE CAPE. An excellent variety forming rather loose heads of a creamy white color and of a good flavor.

ITALIAN GREEN SPROUTING. This is a comparatively new and distinct variety of Broccoli. It produces a large head much like Cauliflower in shape and formation, although of a bluish-green color. When the central head is removed the plant produces many branches, each bearing small heads. 3 to 4 inches of these small stems are as desirable for use as the heads. If the heads are gathered when ready, the plant will continue to produce for a period of from 6 to 8 weeks. When planted in early spring it will develop in about 90 days. However, seeds may be sown in August, and if frozen down during winter, it will sprout out very early in spring.

It is served in the same way as Asparagus.

BRUSSELS SPROUTS

CULTURE—Sow seeds in cold frames or open ground. Transplant the same as cabbage in the early Spring and up to July. Make rows 3 feet apart, having the plants standing 15 to 18 inches apart in the row. Cultivate the same as Cabbage. An ounce will produce about 2,500 plants. Matures about 125 days.

PERFECTION. Stems grow about two feet in height and are thickly set with sprouts forming small cabbage-like heads.

Italian Green Sprouting Broccoli.

Burpee Stringless Green Pod.

BEANS

DWARF GREEN POD VARIETIES

CULTURE—1 lb. will plant 100 feet of drill, 1 bu. to the acre. Bean foliage is very tender and should not be planted until after danger of frost. The first of May is usually a safe time to plant, most any soil will bear a good crop. A rich sandy loam will give biggest returns. Sow seeds in rows 18 inches to 2½ feet apart, dropping the beans 3 inches apart in the row, cover about 2 inches deep. Hoe as soon as seedlings appear. When they begin to form a second or third pair of leaves, hill the rows slightly toward the plant, repeat the hilling process as the plants grow larger. Bear in mind, however, that beans should never be cultivated while the bushes are wet with either dew or rain. For succession of young tender pods, sow every other week up to August 15th. A frequent picking of pods will keep the plants bearing. If the soil is not fertile, use B. & H. Lawn & Garden Fertilizer which should be drilled in the rows before seeds are dropped.

B. & H. IMPROVED RED VALENTINE. Our B. & H. strain of this popular variety is without doubt the heaviest yielding of any of the early Dwarf Green Pod Beans. The pods are long, tender and almost straight, nearly round, smooth and of a healthy green color and have only a few strings when young. Can be picked in about 45 days from time of planting. The plant is a strong and vigorous grower, holding the pods well up off of the ground. In recent years this strain has become immensely popular with the market growers for early and medium early planting. See page 6 for prices.

Tennessee Green Pod.

BURPEE STRINGLESS. The pods of this variety are absolutely stringless in all stages of growth from the time the first pod forms until full grown and ready to dry up. They are very crisp, tender and of fine flavor. The pods are also thick and meaty, round and slightly crease-back; comes into bearing in about 45 days. It is a very profitable bean for the market gardener and we strongly recommend it for home gardens.

BOUNTIFUL. Considered the most productive flat green podded stringless bush bean. The plants are very vigorous and disease resistant. Pods average 6 inches long by ¾ inch wide, are thick through and of a light green color. They are very brittle and absolutely stringless at all stages. Under favorable conditions the first picking can be made in 45 to 50 days from time of planting.

B. & H. Improved Early Red Valentine.

EXTRA EARLY BLACK VALENTINE. The seed of this variety are black, the pod dark green and about six inches long, slender, round and nearly straight, stringy, fibrous and fine grained. It gets tough very quickly, however it has the following good virtues: Being very hardy, it will stand early planting and shipment to a long distance.

FULL MEASURE. A very fine, early, stringless variety. The pods are medium green, round, straight, and about six inches long and of a very good quality. It is a very heavy producer and a profitable bean for the market gardener.

FRENCH'S DWARF HORTICULTURAL. The most attractive of the horticultural class. Vines very erect, straight and compact with a tendency to throw short runners. Pods 7 to 8 inches long, broad, stringy, fibrous and distinctly marked with crimson. We are sure that this will become a leading variety as a shell-out bean for the Louisville market.

GIANT STRINGLESS. Pods of this variety are a little longer, straighter and more slender than Burpee Stringless and are very prolific. While it is a favorite variety for canning, it is highly recommended for market gardeners.

DWARF HORTICULTURAL, or ITALIAN. The pods of this variety are about five inches long and used extensively on this market as a shell-out bean. In the young stages it can be used as a snap bean; however, as pods begin to mature, they color up a greenish yellow splashed bright crimson.

TENNESSEE GREEN POD. One of the very earliest and most productive of the green pods, known in some sections as Dwarf Kentucky Wonder, pods 6 to 7 inches long, broad and flat, nearly stringless and of an exceptionally fine flavor. The plants are large and will continue to bear much longer than any other variety. The flavor of the bean is somewhat similar to that of the Kentucky Wonder. It is therefore highly recommended for home gardens and to those who want a dwarf green pod bean of an exceptionally fine quality and one that will bear over a long period of time.

EXTRA EARLY RED VALENTINE. A well-known, productive variety; very popular for market and home garden.

DWARF GREEN POD BEANS—Continued

Giant Stringless Green Pod.

DWARF, or BUSH BEANS

Wax or Yellow Podded

CULTURE—Same as Dwarf Green Pod varieties.

PENCIL POD BLACK WAX. An improved prolific black wax, having beautiful yellow straight pods of from 6 to 7 inches long, well rounded, meaty and deeply saddle-back. They are always solid, brittle and entirely stringless and of excellent quality.

IMPROVED GOLDEN WAX. The pods average five inches long and are quite fleshy, straight, broad, flat, and of a rich golden yellow color. Absolutely stringless at all stages. Vines grow erect and bear the pods well off the ground, thus preventing rust and rot.

SOUP, or SHELLD BEANS

DWARF WHITE NAVY BEANS. The most popular of all varieties used as a shelled bean. They are snowy white and very uniform in size. Our stock of this variety is carefully selected and will give a better yield than the ordinary commercial stock. They should not be planted before 1st of July on account of bean weevil.

DWARF RED KIDNEY BEANS. A very large Kidney shaped deep red bean. Distinctly flavored, and a heavy producer.

DWARF WHITE KIDNEY BEAN. Very similar to Red Kidney, differing mostly in color and flavor.

DWARF WAX POD BEANS—

	Pkt.	Lb.	7 lbs.	Pk.	Bu.

White Kidney	10c	40c	2.25	4.00	15.00

POLE or RUNNING SNAP BEANS

Kentucky Wonder.

CULTURE—These should be planted about the same time as the dwarf varieties in hills 4 feet each way. If not convenient to secure poles, a trellis can be made by placing a good strong wire 6 feet high between two rows and as beans begin to start a runner, tie small twine to the wire and run down and tie loosely to the bean stalk just above the ground. After vine is well over the wire, pinch off end of runner. This causes the vine to spread and secure itself to the wire. If well rotted manure is not convenient, enrich the hill with a liberal supply of B. & H. Lawn & Garden Fertilizer. If planted in corn, wait until the corn gets 4 or 5 inches high before planting the beans as the bean is a faster grower than corn. Plant 2 beans to each hill of corn, thin out to one. 1 lb. will plant 150 hills.

McCASLAN POLE. A very prolific white-seeded Pole bean. The pods are about 8 inches long, deep green, meaty, stringless and of excellent quality. It is a wonderfully fine bean for use in green stage or as a winter shelled bean.

Striped Creaseback

IMPROVED KENTUCKY WONDER, or OLD HOMESTEAD.

Without question the best flavored of all beans in cultivation. Kentucky Wonder combines size, quality, and productiveness. The long pods are generally borne in clusters of two or four individual pods averaging 7 to 8 inches long. They are deeply saddle-back, very fleshy and perfectly stringless at all stages of development. It is the custom of a great many growers to plant this variety in corn,

however the yield will be much heavier if planted alone and vines supported by poles or some other trellis.

WHITE KENTUCKY WONDER. The very earliest white seeded variety, pods 6 to 7 inches long, round, nearly straight, tender, fleshy and stringless, and of excellent quality. While this is an excellent snap bean, it also makes a very fine dried bean for winter use.

LAZY WIFE. A late productive sort having medium green pods 6 inches in length, broad, flat, stringless, fleshy, brittle and of excellent quality. Dry beans, round and white.

RED SPECKLED CUT-SHORT. A very popular variety for planting with corn, producing an abundance of straight, flat, light green pods $3\frac{1}{2}$ to 4 inches long, the pods being produced in clusters, making it a very easy bean to pick.

NANCY DAVIS or STRIPED CREASEBACK. A vigorous and productive bean that bears quantities of fleshy pods nearly 8 inches long and so round and fat as to be distinctly crease-backed. A fine bean for either the home garden or market, and particularly fine for growing in corn.

WHITE CREASEBACK. Very early and moderately productive, pods 5 to 6 inches long, light green, uniform, round and slender, slightly stringy; beans small, oblong and white. Is used quite extensively as a dried bean for winter use.

HORTICULTURAL, or SPECKLED CRANBERRY. Is grown exclusively for shell bean unless used while quite young, pods straight, flat and are about 5 inches long, pale green becoming streaked with red when matured. The beans may be used either green or dried.

THE EASY GARDEN RAISER

THE EASY GARDEN RAISER

is the ideal garden machine. It operates ten times faster than a hoe. It is infinitely more easy to use. It does a much better job. It enables the garden owner to rapidly and thoroughly cultivate his garden at frequent intervals, particularly after every rain. Standard Model $8\frac{1}{2}$ inch. \$9.25.

BUSH LIMA BEANS

CULTURE—These should not be planted until the ground has become thoroughly warm, should be sown in well enriched land with the rows $2\frac{1}{2}$ feet apart, dropping the beans 10 inches apart in the row, eyes down. The beans should be well hilled to hold the pods off the ground. B. & H. Lawn & Garden Fertilizer supplied at the rate of 10 lbs. to every 100 feet of row will materially increase the yield. This can be done before or after planting. 1 lb. will plant about 150 feet of row, $\frac{3}{4}$ of a bushel to the acre.

BURPEE'S BUSH LIMA. Plants large, sturdy, hardy and productive; pods 4 to $4\frac{1}{2}$ inches long containing 3 to 4 beans which are as large as any pole sort, flat and white.

FORDHOOK BUSH LIMA. Generally considered the best of the large seeded bush lima varieties. Bushes of strictly erect habit, branching freely with all the branches held upright. From 4 to 6 days earlier than other varieties of this class. Pods about 5 to 6 inches long, are found in clusters of 4 to 8, and are well filled with 4 to 5 delicious large beans that are rather thick and of a greenish color.

BURPEE'S IMPROVED BUSH LIMA. A true and improved bush form of the large white lima pole bean with an extra large seed. The plants are vigorous and productive with very large pods 5 inches long and usually contain 4 large thick beans of excellent quality. Seeds show a greenish white tint, making it a very desirable bean for market purposes, also for the home garden.

WOOD'S PROLIFIC BUSH LIMA. This is a small seeded variety, very early and productive; plants grow about 20 inches high and bear continuously throughout season. Seeds are white and used extensively in some sections as a winter dried bean.

HENDERSON'S BUSH LIMA. Possibly the earliest of the bush lima beans. Seeds are a little smaller than the Wood's Prolific. It is very productive, and a very popular variety with the home garden as it is a sure cropper.

Carpinteria Pole Lima.

Fordhook Bush Lima.

POLE LIMA BEANS

CULTURE—Sow when the soil becomes warm and dry. They are more tender than the snap beans. They should be planted with the eyes down, about 3 to the hill, the hills about $3\frac{1}{2}$ by $3\frac{1}{2}$ feet each way. These should be trellised the same as the Snap Pole Beans. Unless the ground is very fertile, each hill should be supplied with at least a half gallon of well-rotted manure. 1 lb. will plant about 100 hills, allowing about 6 beans to the hill, which should be thinned down to 3 plants, after 6 ins. high.

CARPINTERIA GREEN-SEEDED. Vines of strong, vigorous growth, setting many pods, which are closely filled with large, flat beans, much thicker than those of the ordinary Pole Lima. Pods contain 3 to 4 beans, which retain the green tint in the dry stage.

EARLY LEVIATHAN. The earliest of the large-podded sorts. The pods are 5 to 6 inches in length and often contain 5 to 6 large, flat, pale green beans of excellent quality. It is a very early producing variety.

KING OF THE GARDEN. An old standby of vigorous growth, bearing large dark green pods with 4 to 5 large white beans, excellent quality.

EXTRA EARLY JERSEY. Early and very productive. Pods contain from 3 to 4 large beans.

SMALL LIMA, or SIEVA. Early, small, but fine flavor. Makes an excellent dried lima bean for winter use.

Garden Beets

CULTURE—One of the earliest vegetables the garden yields and one of the first to be sown or planted in the garden. Beets should be drilled in rows and covered about ½ inch deep, soil should be packed firmly after seed is covered. After plants are up about 3 inches high, thin out to 3 inches apart. The rows should be about 14 inches apart. The soil should be loamy and fertile, and well pulverized before seeding. For an extra early supply, sow seeds in hotbeds or cold frames about the middle to the last of February and transplant to open ground about the first of April. In order to have a fresh supply of young tender beets, they should be sown every two weeks up to the middle of July. 1 oz. to 50 feet. of drill; 5 to 6 lbs. to the acre.

EARLY WONDER. A selection from the Crosby's Egyptian, very early, uniform and nearly globed-shaped with small top and tap root. Skin dark red, flesh deep blood red with little zoning.

IMPROVED CROSBY'S EGYPTIAN. A favorite variety with most market gardeners. Our improved strain of this variety makes it desirable for that purpose as it is practically a globe shape, being a little deeper from top to base. Color is a dark red. It is extremely early and has a medium size top. The skin is very smooth, flesh dark, very sweet and tender.

B. & H. BRIGHT CROSBY. This newly developed strain of the Crosby Egyptian is meeting with much favor with market gardeners who like a beet that is bright blood red, and one that shows up well after being bunched and washed. In some markets it sells much better than the dark skin varieties. It is very smooth and handsomely shaped as can be seen from the illustration.

Detroit Dark Red.

EXTRA EARLY DARK RED. A fine selection of blood red beet, extremely smooth and of symmetrical growth, fine rich color, and of desirable shape. Shape is nearly round and color of flesh a rich blood red. The tops are small and erect. It is very early, being ready for market a few days ahead of the Crosby's Egyptian.

IMPROVED EXTRA EARLY ECLIPSE. Not quite as early as Crosby's Egyptian, however a very desirable variety for home or market garden. The roots are somewhat top shape and are brighter in color than the Crosby's. The flesh is a bright red and slightly zoned with pink, very sweet, crisp and tender, has a medium size top and makes a splendid variety for bunching.

DETROIT DARK RED. One of the most popular red turnip beets for market gardeners or home use. Being a second early, is used extensively as the main crop variety. The tops are of medium size, fruits very uniform in shape, flesh deep red, very crisp, tender and sweet.

EARLY BLOOD TURNIP. Very uniform, roots always smooth, round and handsome, tops small, of good marketable size and among the best for table use. Color dark, flesh crisp, tender and sweet: good keeper.

B. & H. Bright Crosby Beet.

MANGELS, or STOCK BEETS

Mammoth Prize Long Red Mangel.

CULTURE—All mangels require a rich soil, in order to grow well should be thoroughly cultivated, the seed should be covered about 1 inch. Sow in May or June in rows 2 to 3 feet apart, thin out so plant will stand 8 inches apart in the row. Harvest before freezing weather.

MAMMOTH PRIZE LONG RED. A favorite with the farmer and dairyman. It grows to an enormous size and gives 30 to 50 tons to the acre. Roots nearly cylindrical in shape, light red, growing well above ground; flesh white and rose colored.

GOLDEN TANKARD. Very productive and sweet, flesh yellow, top and neck very small, easily pulled and especially relished by sheep and cows.

SWISS CHARD

CULTURE—Sow 14 inches apart and 1 inch deep early as ground can be worked. When large enough thin out to 10 or 15 inches apart. To assure prompt and even germination, the soil should be pressed firmly on top of seed.

LUCULLUS. Plants grow about 2 to 2½ feet tall and consist, when fully developed, of about a dozen creamy white beautifully curled leaves. These leaves are carried on broad thick stalks. The stalks are almost white and after trimming, can be cooked and served like asparagus. The leaf part can be cooked like Spinach or Kale Greens, however if desired the stalk and leaves can be boiled and served in the same manner as Spinach or Greens. Chard is becoming more popular each year.

Lucullus Swiss Chard.

CAULIFLOWER

CULTURE—Raise plants by sowing in hotbed or greenhouse during January or February. Transplant in cold frame 2 or 3 inches apart each way, set in open ground as soon in Spring as ground can be put in good order. It requires a rich soil, well supplied with humus and moisture. During dry weather, especially when the plants are heading, a light side dressing of Nitrate of Soda will be of much help. Set plants 18 inches apart in rows 2 feet apart. When the heads are formed, they should be bleached by drawing the leaves together and trying with soft string or rubber band. 1 oz. of seed produces about 2,000 plants.

B. & H. EARLY SNOWBALL. We consider our strain of this variety second to none which comes direct to us from one of the very best growers in Denmark. The heads are very early, of medium size, firm, compact, solid and very white; plant compact in growth with few short upright leaves.

B. & H. Early Snowball Cauliflower.

CHINESE CABBAGE

CULTURE—For spring crop sow seed in beds, transplant and cultivate the same as early cabbage. For fall crops sow seeds about 15th of July.

PE-TSAI. This produces long, slender, very solid head often measuring 20 inches in height and closely resembles in the habit of growth the Cos Lettuce. The outer leaves are light green, inside is of a beautiful cream yellow which are very tender and of a delicious flavor.

CABBAGE, B. & H. Select Stock

CULTURE—For early crop the seed should be sown in hotbeds or in boxes in the house in December or January. Summer crops can be sown outside and then transplanted where they are to remain. Plants should be transplanted in good, rich, clean, light soil in rows $2\frac{1}{2}$ to 3 feet apart, plants 14 to 18 inches apart in the row, according to the variety of cabbage. Early Cabbage should be planted close together, the later ones farther apart. 1 oz. of seed will produce from 1500 to 2000 plants.

EXTRA EARLY JERSEY WAKEFIELD. A well known and extra early popular variety. Heads cone shaped and very solid and extremely uniform in both green color and size. It is usually the first cabbage on the early market.

B. & H. SPECIAL CHARLESTON WAKEFIELD. It is not quite as large as the regular Charleston Wakefield, but will mature several days earlier.

CHARLESTON WAKEFIELD. This variety is about one week later than Jersey Wakefield, but the conical heads are fully one-half larger. Its exceeding hardiness, earliness and size of head have made it very popular with market gardeners. Also a splendid early variety for home garden.

B. & H. GOLDEN ACRE. Is the big money-maker for the early market grower, and without question the earliest and most uniform in maturity of all cabbages. B. & H. Golden Acre heads are round, very firm with few outer leaves, which permits close setting in the rows. The growth is rather dwarf and compact.

EARLY FLAT DUTCH. This is an old standard variety that needs little introduction. It is a medium early variety, growing a large flat head on a short stem.

B. & H. Golden Acre.

GLORY OF ENKHUIZEN. One of the best for second early or main crop. The heads are large, round and solid, usually weighing 8 to 10 pounds. It is an excellent summer crop variety.

SOLID SOUTH. A very desirable cabbage of intermediate season, adapted for autumn as well as late summer use. The heads are nearly round, are somewhat flat, very solid and of excellent quality.

LOUISVILLE DRUMHEAD. Our seed of this splendid and popular variety is grown by one of the best growers in this vicinity from carefully selected heads of true type. It is the most popular of all varieties with the local market gardeners for late or main crop. Stands summer heat splendidly and produces large, firm, broad, flat heads, fine grained and sweet.

MAMMOTH RED ROCK. This variety is the most popular of the Red variety. It produces a very solid head weighing about 10 pounds, of intense dark red color. Is used very largely for pickling on account of its excellent flavor and attractive color.

LATE FLAT DUTCH. A justly popular and esteemed variety; heads large, round, flat, and very firm; has medium stem and is very hardy.

Glory of Enkhuizen.

SUCCESSION. This is a very popular, sure-heading, second early variety. The heads are very large, firm and nearly round. It is used very extensively as a summer variety.

LARGE LATE SUREHEAD. An exceptionally fine late variety, heads are large, round and slightly flattened, very hardy and fine grained, a splendid keeper.

COPENHAGEN MARKET. A splendid extra early round-headed sort which matures as early as the Charleston Wakefield. The heads are large and round and unusually firm, averaging 5 to 8 pounds in weight; stems short; it has few leaves and is of an upright growth. It can be planted as close as Charleston Wakefield.

CARROT

CULTURE—For early crop sow as soon as the ground can be worked and for later crop from the beginning of May until the latter part of July, rows 12 to 14 inches apart and $\frac{1}{2}$ inch deep, thin out the young plants to 3 inches. Carrots will do well in almost any soil; however, the better the soil, the better the carrot crop. One ounce will sow 100 feet of drill.

Louisville Market.

LOUISVILLE MARKET. A most excellent medium early, half-long variety; is one of the best in quality for market. Tops are medium size with small necks. The mature roots are thick, 5 to 6 inches in length, uniformly half-long, stump-rooted and taper slightly, smooth, deep orange-red in color. This variety is used extensively for bunching.

NANTES. This is a very popular medium-early variety for home gardens and market; the roots are 5 to 7 inches long, nearly cylindrical, with remarkably small neck, blunt-ended, smooth and of bright orange color; almost coreless and tender throughout. You will like the distinct flavor of this Carrot.

IMPROVED DANVER HALF-LONG. It is stump-rooted and succeeds well on most all classes of soil. Tops of medium size, roots deep orange, large, but of medium length, tapering uniformly to a blunt point, smooth and handsome. Flesh sweet, crisp and tender. It is a very heavy yielder and while it is one of the leading table sorts it is also used a great deal for stock feed.

IMPROVED LONG ORANGE. An intermediate season standard sort, roots 12 inches long, about 3 inches broad at the crown, tapering rapidly to a point, deep orange color. It is a very heavy yielder and requires a deep soil. While a good table variety, it is also recommended for stock feed.

CHANTENAY. An excellent medium early half-long stump rooted variety, root about 6 inches long tapering toward base and running suddenly to a point, very smooth and of a deep orange red color highly recommended for market or home garden.

OXHEART. A rapid growing, short thick carrot. The mature roots are $4\frac{1}{2}$ to 5 inches long; very thick at shoulder and gradually tapering, ending abruptly to a small tap root. The orange colored flesh is very sweet and tender. The short length of the Oxheart makes it more desirable for stiff hard soils than the longer rooted varieties.

CELERY

CULTURE—It requires rich, loamy, moist soil. In early Spring, drill the seed in rows about 12 inches apart. As the seed is rather hard to germinate, the soil should be firmly packed after a very light covering and watered frequently. They should then be transplanted from the 1st to the middle of July in rows 3 feet apart, and set 6 inches apart in the rows. At the time of planting, care should be taken that the roots are firm in the ground. In home gardens, celery is often planted in double rows, that is, 2 rows 10 inches apart, then 3 feet to the next 2 rows, which provides ample soil for hilling which is necessary for blanching and whitening. In hilling, care should be taken not to cover the crown of the plants. 1 oz. will produce about 3,000 plants.

GOLDEN PLUME, or WONDERFUL. A comparatively new variety closely resembling the Golden Self-Blanching in crispness and flavor. It is larger and a more rapid grower. The plants are semi-dwarf and resist blight and other celery diseases much better than other varieties. It is unequalled in quality, it has a very pleasing appearance and commands ready sale. We highly recommend this variety for market or home garden.

GOLDEN SELF-BLANCHING. We consider this variety second to the Golden Plume. It is very early, plants compact and stocky, very thick, fine flavored; when blanched is of an excellent golden yellow color.

WHITE PLUME. A very early maturing variety, easily blanched and of a beautiful silvery white color.

GIANT PASCAL. A compact, vigorous and productive variety and one of the best for winter use. Leaves upright and dark green. Stalks short, thick and very broad, blanching a beautiful yellowish white.

CUCUMBER

CULTURE—For very early cucumbers, sow seed March 15th in a hotbed. If paper bands are used, they can be transplanted without disturbing the root system. When weather has become settled and warm, sow seed in hills 4 to 6 feet apart each way. Thin out, leaving 4 of the strongest plants in each hill. They do best in rich loamy soil. For succession of this crop make plantings at intervals until July 10th. F-2 Dust is an effective remedy against insect enemies of this crop. This should be applied frequently with a duster.

B. & H. LONGFELLOW. Those desiring an extremely long, dark green cucumber should plant our Longfellow; it grows 12 to 14 inches long, handsomely shaped, and a beautiful dark green color, 2 to 2½ inches in diameter, making a splendid slicing variety.

B. & H. LONG WHITE SPINE. A comparatively new variety, one that is especially valuable to the market gardener. It is about one-fourth longer than the Improved White Spine and holds its dark bluish green color well, remaining edible for a long period after picked. It is fairly prolific and edible in about 60 to 62 days. We highly recommend this as a main crop variety.

B. & H. Improved Early White Spine.

B. & H. IMPROVED EARLY WHITE SPINE. No doubt the very best Cucumber for early market. Will hold its intense dark green color better and remain edible longer than almost any other strain of White Spine. Ends taper, skin smooth, and its fruits are uniform and symmetrical. 8 to 9 inches long, very firm and crisp.

IMPROVED LONG GREEN. A standard cucumber for either slicing or pickling. It is extremely prolific, medium size, and for hardiness and disease-resistance it is the very best. The ends taper somewhat and it is slightly warted. The small pickles are well shaped, and in the slicing stage the fruits are very attractive.

SNOW'S PERFECTION PICKLE. Somewhat like the Chicago Pickle except that it is smaller. It is one of the most smooth, symmetrical pickle kind we know of, and is highly recommended for its uniform early pickles. It is enormously productive and the square-ended pickles are very attractive.

B. & H. Longfellow.

DAVIS PERFECT. A long smooth cucumber with pointed ends with excellent edible qualities. It is a deep green color when in slicing stage, medium late in maturing.

STAY GREEN. An early medium sized cucumber growing about 6½x2¼ inches. It is noted for its intensely dark green color which it retains for a long period of time. It is an enormous yielder and is highly recommended chiefly for early market where length is not a necessity. It is very doubtful if it is excelled for earliness, color and heavy yielding.

GHERKIN (Small). Grown exclusively for pickles. The fruit is very small, somewhat oval in shape, light green and covered with spines.

EGG PLANT

CULTURE—Thrives well in any good garden soil, seeds should be grown in hotbeds about middle of March and transplanted, when plants are sufficiently large, in cold frames. If paper bands are used, they can be transplanted to open ground when soil becomes warm without disturbing root system. They should be set about 2 ft. apart in 3½-ft. rows. 1 oz. will produce about 1,000 plants. Two-way Spray keeps bugs away.

BLACK BEAUTY. About one week earlier than the New York Purple and of a rich lustrous purplish black color. It is a distinct sort and a favorite where known. The plants are remarkably healthy in their growth and yield an abundance of large fruit. The fruits are entirely spineless and very attractive in appearance.

NEW YORK IMPROVED PURPLE. The strong bushes are larger than Black Beauty, keeping the eggs off the ground better. The large dark purplish fruit is heavy at the base, narrowing at the top.

SWEET or SUGAR CORN

Home gardens are not complete without sugar corn. If possible, successive plantings should be made from beginning to end of season. The market gardeners should plant more sugar corn, as the demand for it is commanding a higher price than other roasting ears.

CULTURE—It is well to take chances in the home garden by planting a small quantity of Extra Early and Early Adams, early in Spring, however, if ground is too cold and remains so, the seed is liable to rot. Sweet Corn should not be planted until the ground is warm. Corn is mostly planted in drills, dropping one kernel every 6 inches and thinning out to 12 inches after the corn gets a good start. The rows should be from 3 to 3½ feet apart. Corn will succeed well on most any soil, however, will make more rapid growth by using a small quantity of a good commercial fertilizer. For succession of fresh roasting ears, a planting should be made every 10 days or 2 weeks throughout the season up until the middle of July.

B. & H. Bantam Evergreen.

GOLDEN SUNSHINE. The earliest of the Golden Bantam type, maturing a week to ten days earlier than that variety. More dwarf in habit than Bantam, with ears 6½ inches long, containing 12 rows of broad, yellow sweet grains, especially desirable for its extreme earliness and fine flavor.

Golden Bantam.

WHIPPLE'S EARLY. An extra early variety with deep grains of the Evergreen type, stalks usually from 5 to 6 feet high and of a vigorous growth. The ears are produced about 1½ to 2 feet from the ground, often 2 to the stalk, and are about 8 inches long, rather blocky in form, 16 to 18 and often 20 rows, filled to the end with rather narrow, deep grains of pearly whiteness and very sweet.

GOLDEN BANTAM. A very popular golden yellow color and of high quality, ears 6 to 7 inches long, 8 rows, and are filled from butt to tip with deep broad grains of attractive color and a most delightful flavor.

BLACK MEXICAN. One of the sweetest and best, ears 8 inches long and 8 rows, grains bluish black when ripe.

BANTAM EVERGREEN. This is a cross between the Golden Bantam and Stowell's Evergreen. A most excellent sort of fine quality. The ears are about 8 inches long, 12 to 14 rows; the grain is rather broad and deep and of a rich golden yellow color.

COUNTRY GENTLEMAN. An old standard second early variety, ears about 7 to 8 inches long, cobs small white and densely covered with long slender white grains without row formation.

STOWELL'S EVERGREEN. The standard and best known sweet corn, ears 8 to 9 inches long, 16 to 18 rows, with a very deep sweet grain. On account of its size and productiveness, no doubt the most profitable for the market gardener.

Country Gentleman.

CORN

Early Roasting Ear Varieties, Northern Grown

Seed Ear—B. & H. Select Extra Early Adams.

Early varieties, the stocks of which are carefully selected and grown especially for roasting ear purposes. The following five varieties are not sugar corn, however they are more hardy than sweet corn and can be planted earlier and come into the market before the sugar corn matures, therefore commanding the highest price.

B. & H. SELECT EXTRA EARLY ADAMS.

This variety is the first locally grown corn known to reach market. Our the earliest that we know of, ears 5 to 6 inches long, stalks very dwarf; it is very hardy, standing early planting exceedingly well.

special strain of this variety is than the Extra Early Adams, stalk ordinarily grows about 6 feet high, ears 6 to 7 inches long.

IMPROVED EARLY ADAMS. About one-third larger and one week later than the Extra Early Adams, stalk ordinarily grows about 6 feet high, ears 6 to 7 inches long.

B. & H. TRUCKER'S FAVORITE. This variety is very early, coming in pretty much the same time as the Early Adams. The ears are considerably longer and not quite as large in diameter. The husks have blades similar to sugar corn. The flavor is delicious and a ready seller on the market.

EARLY NORTHERN WHITE FIELD. This is a variety that has been grown in this section for a long time and needs very little introduction. It often has two ears from 9 to 10 inches and is ready for market a week or ten days after the Trucker's Favorite. This is not only a very valuable variety for market purposes, but is now being grown by a number of farmers as an early feed variety. Our stock of this splendid variety is Northern grown and second to none.

E A R L Y SNOWFLAKE.

Unquestionably one of the best roasting ear corns to follow our B. & H. Trucker's Favorite or Early Northern Field.

Improved Early Adams.

It is only a few days later than the Early Northern Field, maturing in 90 to 95 days. The ears are larger, well filled with pearly white grains that are fairly deep. The ear being large, the grower has the advantage of a profitable feed crop, if prices do not justify cutting for roasting ears.

B. & H. Trucker's Favorite.

**THE AVERY NEW UNION
One Row Corn Drill**

Will plant corn, garden beans and peas uniformly, and most any distance and depth desired. Construction very simple and durable.

ENDIVE

CULTURE—For early use, sow about the 1st of April; for late or Fall use, sow in June or July. This should be drilled in rows 14 inches apart and covered very shallow. When 2 or 3 inches high, thin out to 1 foot apart. Before they are fit for table the plant should be bleached. This is done by drawing the leaves together and tying with soft twine or rubber bands. This should be done when plants are dry. It requires about 3 weeks for the plants to be properly bleached. 1 oz. of seed will drill about 100 feet row.

LARGE GREEN CURLED. The most hardy and vigorous sort, leaves bright deep green, readily blanches creamy white. A favorite variety with the market gardener.

FRENCH ENDIVE, or WITLOOF CHICORY. The plant may be blanched in same manner as other Endives, however, it is mostly grown for use in salads. Sow seeds in early spring in same manner as parsnips, pull roots in the fall and store away until ready to replant. It is the sprouts from these roots that are used in salads, and they may be had all during the winter by planting the roots at intervals in sand or rich loam in warm cellar or under greenhouse benches. Set roots vertical 3 inches apart and cover 6 to 8 inches. It requires about 4 weeks for shoots to appear.

Green Curled Endive.

Market Gardeners: Don't overlook
B. & H. SPECIAL SCOTCH KALE
It stands cold weather.

KALE

CULTURE—The large majority of Kale seed is sown during July and August for winter greens. The Siberian while not nearly so curly as the Scotch, is hardier and is seldom winter killed. The seeds are usually sown broadcast 3 lbs. to the acre. Some are very successful growing Scotch Kale in 18-inch

drills. One-quarter to one-half pound is sufficient for the average family garden.

DWARF CURLED SIBERIAN. A most vigorous and spreading variety. Leaves are large and rather plain in the center, with cuts and frills at the edges, color bluish green, very hardy, usually stands through winter in this latitude.

B. & H. SPECIAL DWARF CURLED SCOTCH. This is a carefully selected strain of Scotch Kale which is very dwarf and spreading close to the ground. It is of a very deep green color and the leaves are more finely curled after light freezing weather. Our Special Scotch Kale is very hardy and will stand more winter weather than the Dwarf Green Curled Scotch. If seeds are sown in June or July, a strong growth will be made, enabling it to stand better during freezing weather.

DWARF GREEN CURLED SCOTCH. This strain of Scotch Kale is recommended for spring sowing when wanted for early summer or fall market. It is very dwarf, spreading close to the ground.

TALL GREEN CURLED SCOTCH. Has finely curled, long plume like leaves, borne near top of strong stalk.

PLAIN, or SMOOTH. Smooth leaves, very early, used extensively for early spring sowing. It is a very rapid grower and usually the first on the spring market.

Early White Vienna Kohl Rabi.

MUSTARD

The Curled Mustards are used extensively for greens. They grow very rapidly.

CULTURE—Sow in early Spring, June or July, in rows 1 foot apart or broadcast. Plants should stand about 4 inches apart. 1 oz. will sow 100 feet of row, 1½ lbs. to the acre.

SOUTHERN GIANT CURLED. Plant vigorous and hardy, of upright, sturdy growth; leaves large, light green, tinged yellow, much crumpled and frilled at edges. Very profitable variety for market gardeners.

FORDHOOK FANCY. A comparatively new variety that has long, slender, upright, finely curled leaves of a deep green color with edges deeply cut. The plant makes vigorous growth, stands a long time before going to seed.

WHITE LONDON. Plants of rapid, upright growth, rather small and smooth leaves; color deep green. Seeds large, cream color, often used as seasoning.

KOHL RABI

CULTURE—This vegetable combines the flavor of Turnip and Cabbage. It excels both in nutrition. It is very hardy and productive. Sow as early in the Spring as the ground can be put in good gardening condition. Drill in rows like Radishes or Beets. Thin out so they will stand about 4 inches apart in the row, having the rows about 18 inches apart. They are ready when bulbs average from 2½ to 3 inches in diameter. The thick outer skin should be removed before boiling. Serve like Turnips. One ounce of seed will sow a drill of about 100 feet.

American Flag Leek.

EARLY WHITE VIENNA. Extremely early, with few leaves and small top; bulbs are medium size, very light green, nearly white, and the best quality.

EARLY PURPLE VIENNA. Early and with small top. Bulbs medium size and purple in color. Flesh white.

LEEK

CULTURE—Sow about 1st of April in drills 1 foot apart ½ inch deep. When 6 or 8 inches high, transplant into deep rich soil in rows 12 inches apart and 4 inches apart in the row. Set as deep as possible so the plants may be covered and blanched. Draw the earth up to them gradually as they grow. Plant 1 oz. to 100 feet of drill.

AMERICAN FLAG. Produces a large thick stem, and is of mild flavor; the leaves are short and the plant is very hardy; suitable for planting either in the spring or fall.

Fordhook
Fancy Mustard.

B. & H. LETTUCE

CULTURE—For very early crop, seed should be sown in hotbeds and transplanted in open ground fairly early in the season. They are hardy and will stand quite a bit of cold weather. The loose heading varieties do well very often when sown broadcast. One habit is to sow in 1 foot rows and thin out when the plants begin to spread to 3 inches apart. Heading varieties should be sown very early in the Spring in drills 12 inches apart. After well up thin out to 6 inches apart in the row. Cultivate often and if ground is not very fertile, use Nitrate of Soda or High Grade Fertilizer which will add to the crispness of the Lettuce, by giving a rapid growth. 1 oz. will make about 600 plants or sow about 300 feet of row.

B. & H. GRAND RAPIDS. The favorite loose leaf for forcing under glass, does well for early planting outside, leaves exceptionally crumpled, border finely frilled, color very light green with no trace of brown. Our B. & H. Strain of Grand Rapids is unexcelled for greenhouse planting and is a money maker for those who plant it.

LOUISVILLE MARKET. A variety that is very popular, especially in this vicinity. The general appearance of this lettuce is very similar to Black Seeded Simpson. The texture of the leaves is somewhat thicker, consequently making a heavier lettuce, and does not seem to rot off as easily in hotbeds as the Simpson.

B. & H. LETTUCE—Continued

Grand Rapids.
B. & H. Greenhouse Strain.

BLACK SEEDED SIMPSON. One of the most popular loose leaf varieties, always reliable, leaves broad and crumpled and frilled at border, color light yellowish green.

IMPROVED HANSON. One of the most reliable, sure-heading sorts; heads globular, large and late; leaves large and very broad, fairly blistered and crumpled, borders finely frilled. Color clear light green, quality good. A fine variety for midsummer planting outside, as it stands the hot season better than most sorts and is a slow seeder.

BIBB LETTUCE. A waxy head variety with very deep green outer leaves, bleaching to a rich yellowish green inside; heads medium size and of distinct flavor. Very popular for family gardens and exclusive hotel trade.

CALIFORNIA CREAM BUTTER. Plant compact, head large and very firm; color deep green, outer leaves splashed with brown. The heads blanch a beautiful golden yellow.

Big Boston Lettuce.

EARLY CURLED SIMPSON. Early, medium large, crisp and loose heading; leaves rather short and broad, much crumpled and well frilled on the borders. Color very light green.

B. & H. NEW YORK HEAD. A very large, late, globular heading variety, leaves broad, of thick texture, fairly blistered and crumpled; border frilled; color clear dark green.

MAY KING. A handsome, small, extremely early, compact heading variety; leaves light yellowish green; the heart blanches rich golden yellow. It is a very sure-heading variety.

UNRIVALLED SUMMER. Very similar to Big Boston in form and habit of growth, differing in being of a slightly lighter shade of green and without the brownish tinge at the border. It is a very desirable variety for summer sowing.

B. & H.
New York Head.

BIG BOSTON. Very popular for outside culture as well as cold frame; heads large and compact, leaves broad, almost smooth with waves at the edge; color a light green slightly tinged reddish brown; heart greenish white tinged yellow.

ICEBERG. A large, late, crisp, cabbage-heading variety; heads very firm, hard and well blanching.

SALAMANDER. Very reliable early sort; heads globular, firm and well blanching; leaves broad and crumpled; color medium green.

TRIANON COS. A medium large, strictly self-closing lettuce, making a well formed and firm, cone-shaped head; quality excellent.

Trianon Cos
Lettuce.

CANTALOUPEs, B. & H. Selected Stock

CULTURE—For early melons, seeds can be planted in plant bands and set in cold frames until after the danger of frost and then transplanted into the open ground in hills 4 to 6 feet apart each way. If possible, use well rotted manure in each hill. If seeds are planted in open ground, plant about 10 seeds in different parts of the hill just under the surface of the soil. When well up, thin out to 3 or 4 to the hill. It requires about 1 oz. of seed to 60 hills, or 2 lbs. to the acre. F-2 Dust is a very effective remedy against enemies of the Cantaloupe crop.

Haile's Best.

EDWARDS PERFECTO. A very Superior type of the Rocky Ford Melon, having a deep tinted Salmon flesh and exceedingly small seed cell, a firm hard gray netting and excellent shipping qualities.

POLLOCK'S 10-25. A salmon-tinted Rocky Ford. The flesh is light salmon in color at center, shading into a light green midway to the rind; fruit very uniform in size, nearly round and densely covered with a hard gray netting. This melon shows little or no rib.

GOLD-LINED ROCKY FORD. The fruit is small, almost round, smooth, showing no rib, densely covered with a hard gray netting; flesh thick deep green, showing a faint lining of pink or gold lining at the center. It has proven a very popular melon for the market gardener.

Netted Tip Top Cantaloupe.

B. & H. GEM. An extremely early, medium sized melon; fruit oblong, skin deep green, turning to a golden color at maturity. Densely covered with close gray netting; distinctly ribbed; flesh fairly thick and very sweet; color medium green, blending to a light pink near the center.

HEARTS OF GOLD. A splendid, small market or shipping variety; fruit round with tendency to heart-shape, slightly ribbed and covered with a fine netting; flesh very thick, deep salmon color and of high quality.

NETTED TIP-TOP. Smooth, large, gray-green in color, round flattened at the ends, distinct rib, and well netted, flesh very thick, deep salmon in color and of the highest quality. Being netted and a very large melon, it is rapidly replacing the old Tip-Top.

B. & H. Gem "Selected."

BENDER'S SURPRISE. Closely related to the Netted Tip-Top, different from that variety in being more oblong, more full and rounded at the ends, not quite as well netted.

ACME. A fine, medium early, oblong, green-flesh variety of good size, closely netted and prominently ribbed.

HAILE'S BEST. A remarkably early variety. Melons are oval in shape, about 8 inches long by 4½ inches in diameter, with heavy netting and fairly distinct ribbing. Flesh exceptionally thick and deep salmon in color. A very profitable melon for the market grower.

MAKE MORE PROFIT ON MELONS BY USING HOTKAPS.

WATERMELONS, B. & H. Carefully Selected

CULTURE—When the ground becomes warm, plant in hills 6 to 8 feet apart each way. If possible, use a good shovel full of well-rotted manure in each hill, this should be 4 or 5 inches under the top soil. Plant 10 seeds to the hill and when plants are well up, thin out to three. Cultivate until vines cover ground, pinch ends of the growing shoots to induce early fruiting. 1 oz. will plant about 40 hills or 2 lbs. to the acre.

B. & H. IMPROVED KLECKLEY'S SWEET is a much improved type of the Kleckley's Sweet, containing all the good virtues of the old melon in eating qualities; however more regular in size and shape, larger, more productive, and in every way a much better melon than the old Kleckley's Sweet. It is oblong and has an even dark green skin, rather thin rind and rich, bright colored flesh. It is a very profitable melon for market and especially highly recommended for the home garden.

B. & H. TOM WATSON. One of the best main crop sorts, being very highly recommended for market purposes, as it is a handsome, oblong, dark green melon and always demands the highest market price. The rind is very thick and tough, flesh rich red and of a very good quality.

IRISH GREY. A comparatively new melon, very popular for market or home garden. It is an oblong melon, growing to a large size. The flesh is red and crisp and free from strings, the rind is a mottled light gray green entirely distinct. It has a very tough thin rind.

GEORGIA RATTLESNAKE. One of the old-timers that still remains good and is always a ready seller. This melon is oblong and grows to a very large size. In color it is light green, irregular, striped with a dark green, flesh red, sweet, juicy.

STONE MOUNTAIN. The peak of perfection in melons. In just a few years it has reached first place with growers for both shipping and local markets. It has a medium green rind and a deep pink flesh, and is pronounced by all the most delicious of all melons. The flesh is very sweet and tender. It grows to a large size; almost round or square shaped.

B. & H. EXCEL. In recent years this has become the most popular melon with the local growers for market purposes. Very large, oblong shape, dark green rind, slightly mottled with a lighter shade, the rind is thick, flesh red, very crisp, tender, juicy. The seeds that we offer of this variety come from the very choicest of melons carefully selected and hand cut.

HALBERT'S HONEY. A most excellent melon for the home garden. It is very early and one of the sweetest melons grown; it is claimed by a great many to be even sweeter than Kleckley's Sweet. Its delicious crimson red flesh extends nearly to the skin, the rind being very thin and brittle. The melon is long and its dark green skin gives a handsome appearance.

FLORIDA FAVORITE. Early and oblong in shape and grows to a fair size, rind light green with an irregular stripe of a dark green; flesh red and of a fine quality. It has a rather tough rind of medium thickness.

Okra, Onion, Parsley and Parsnips

OKRA

CULTURE—A vegetable that is very easy to grow in any garden. This is a very tender plant and seeds should not be sown until ground is warm. Sow in rows 3 feet apart, 3 to 4 seed per foot. Thin out when plants get a good start to 10 inches. 1 oz. to about 30 feet of drill, 4 lbs. to an acre.

WHITE VELVET. Plants about 3½ feet high, pods white, long, smooth and tender; early and productive. Very popular for market and home garden.

DWARF PROLIFIC. One of the earliest and most dwarf varieties; pods short, deep green, slightly corrugated; quality very good.

PERKINS MAMMOTH POD. Early and productive, the pods are deep green, very long, slender, slightly corrugated, very tender and of good quality.

ONION SEEDS AND SETS

CULTURE—Seed should be planted very early in the Spring, in fact, one of the very first to sow in the garden. It is well to have the soil prepared the previous autumn. When sowing for sets, plant in drills 12 inches apart, 10 seeds to the inch, cover with about ½ inch of fine soil. If large onions are wanted from the seed, drop in drill about 1 inch apart and thin out to 2 after plants are about 4 inches high. If onion sets are used to grow large onions, plant in rows 12 to 14 inches apart and 4 inches apart in a row.

WHITE PORTUGAL, or SILVER SKIN. The bulbs are flat in shape and are very largely used for growing sets on account of their fine shape when small, and good keeping quality. It is grown very extensively for use in the green state as a bunching onion and is well liked for pickling.

LOUISVILLE YELLOW DANVER. This is a standard and extensively used yellow variety in this section for growing of sets. Skin is light yellow in color, bulbs medium large, slightly flattened, quite thick with small neck. Our seed of this variety is grown locally and preferred by many of the growers on account of its producing sets with better keeping quality.

JAPANESE, or EBENEZER. A recent introduction that is becoming very popular. The onions are very large, somewhat flattened, has attractive yellow skin and firm white flesh of delicate flavor. Sets grown from this variety have good keeping qualities.

RED WETHERSFIELD. A fine large flat sort of deep purplish red color, noted for its productiveness.

PRIZE TAKER. One of the largest Onions grown and the mildest, the bulbs are of globe shape and a light straw color.

SOUTHPORT YELLOW GLOBE. A true deep globe, having a small neck and a heavy thick skin which makes it an excellent storage sort, the color is a deep yellow or golden brown, flesh is thick and mild in flavor.

YELLOW GLOBE DANVER. This Onion is much more popular and commands a higher market price than the flat varieties, its globe shape and being a heavy yielder, it is a very profitable Onion to grow, has excellent color, cures well.

Hollow Crown Parsnips.

PARSLEY

CULTURE—Sow in early spring in rows 12 inches apart, covering seeds about ¼ inch, pressing down the soil after covering. The seed is very slow to germinate, often requiring 4 or 5 weeks. It is advisable to soak the seeds a couple of days before sowing, which will hasten germination. The moisture can be retained by covering rows with boards or old bags. One ounce will sow about 150 feet.

CHAMPION MOSS CURLED. A strong, compact plant of a rich dark green, closely curled and one of the best both for decorative and flavoring purposes.

PLAIN. The leaves are flat, deeply cut, but not curled and very dark green in color.

PARSNIPS

CULTURE—Plant seed in early spring as soon as the soil has become warm. The rows should be from 14 to 18 inches apart, the plants 5 inches apart in the row. Cover seeds about ¼ inch. A rich loamy soil is best and should be loosened 10 inches deep. They are very hardy, the flavor being much improved by frost, and may be left in ground during winter and dug as wanted. One ounce will sow a 100 foot row.

LOUISVILLE SPECIAL. A favorite with the market gardener. Has a very deep hollow crown, rather top-shaped with small tap root, early, productive and excellent quality. This variety always commands the highest market price.

SUGAR, or HOLLOW CROWN. This is a long smooth variety growing from 10 to 12 inches long, very tender and sweet, and of an excellent flavor; color of a creamy white. We recommend this for home garden.

Our Motto
ONLY THE BEST

B. & H. GARDEN PEAS

CULTURE—If weather conditions are favorable, smooth varieties are often sown in February. Any of the varieties can be successfully grown if planted during any of the early Spring months, March and April being preferred. By planting early, medium early and late varieties at the same time, a succession of fresh peas may be had over several weeks.

Peas may be had in the Fall months by planting from July up until the middle of August. Plant in drills 2 inches deep and about 20 peas to the foot in rows from 24 to 36 inches apart, depending on the variety. In the home garden it is a good idea to plant tall varieties in double rows about 10 inches apart. One wire or brush trellis between would be sufficient for both rows. 1 lb. will plant 30 feet of drill, 2 bus. to the acre.

B. & H. SUPREME. Has proven to many market growers that it is the **big money-maker** in the Large Dwarf Pea class. Remember three or four days often makes a difference in market prices. **B. & H. Supreme** gets there before Laxtonians, and is more prolific, pods as large and darker green; vines about same height. To our knowledge this pea has no equal in size, earliness, productiveness, evenness of maturing and eating qualities in the dwarf pea class. It is very sweet and tender. The large, dark green pods are well filled and command the highest market prices.

For Market Growers **B. & H. Supreme** are packed in $\frac{1}{2}$ and 1 bushel cotton-sealed bags, and judging from the many splendid reports received from those who have planted **B. & H. Supreme**, we feel safe in saying without fear of contradiction that it is the outstanding Market Growers Pea.

One customer who placed an order for 6 bushels for spring 1929 said if he couldn't get **B. & H. Supreme** that he would not plant peas. Another said he got enough from the second picking to more than pay for his seeds.

You can't go wrong on **B. & H. Supreme**.

B. & H. IMPROVED CLAUDIT. The most popular of the smooth blue seeded varieties for market gardeners' use. The seed is about one-third larger than the old Claudit, and will stand planting as early as the Alaska. The vine grows about 20 inches high; pods deep green, 4 inches long, broad and saddled backed. It will mature from 3 to 5 days earlier than our **B. & H. Supreme**. It is a money-maker for the early pea grower.

THOMAS LAXTON. A very popular gardener's variety: height 2 $\frac{1}{2}$ feet; vine and foliage moderately stout, medium green; pods medium green; 3 $\frac{1}{2}$ inches long, straight, nearly round and square ended, containing 7 to 9 medium dark green peas of superior quality. Compared with Gradus, is a little earlier, more productive, but with a smaller less broad pod.

LITTLE MARVEL. An extra fine, dwarf, sweet pea. Grows about 12 to 16 inches tall. It is among the earliest of the wrinkled peas. It is very productive, pod dark green, about 3 inches long, round, with square end and often contains 7 dark green peas of high quality.

GARDEN PEAS—Continued

Improved Dark Pod Telephone.

IMPROVED DARK POD TELEPHONE. The pods are much darker than the old variety, the vines very strong and stout, growing about 4 feet high; pods 4¾ inches long, very broad, dark green, pods straight and slightly curved at the point; contains 9 large medium green peas of the finest quality. It is classed as a late variety, although is one of the heaviest yielding. It is a very profitable pea to plant as a second or third early, to come into bearing after Gradus, Thos. Laxton and such other varieties.

EXTRA EARLY ALASKA. The very earliest, smooth, green pea, height about 2½ feet; the pods are round, straight and square ended, containing six light green peas, very uniform in maturity. It is a very popular variety for home garden as well as for market garden purpose.

IMPROVED GRADUS. This is an improvement over the old type of Gradus, being slightly earlier, more dwarf, true to type and productive. The vines are moderately stout, medium green, pods medium green, 4 inches long, fairly broad, pointed and well filled with 7 to 9 very large, dark green peas of exceptional quality; only grows 2 feet high. This should become a very popular variety with the market gardener as second early. We especially recommend this for home gardens.

LAXTONIAN. A giant podded, early dwarf wrinkled variety. It is a real money-maker for the market gardener, being a few days earlier than Gradus and more dwarf. The pods are 3¼ to 4 inches long, dark green, containing 6 to 8 large peas of excellent quality. Our strain of this variety is unsurpassed. Height 16 inches.

LITTLE GEM. A very popular early dwarf wrinkled pea for the home garden; pods light green, 3 inches long, round, square ended and well filled with 6 or 8 peas of good quality; very productive; height about 18 inches.

SUTTON'S EXCELSIOR. An improvement on Nott's Excelsior with larger pods and greater productiveness; pods light green, 3½ inches long, straight, round, and square ended, containing 7 to 8 large light green peas of very fine quality; height 16 inches

SUMMER QUEEN. A late wrinkled variety, strong and vigorous grower; pods a dark green, about 4 inches long, broad and pointed, containing 8 to 9 peas of good quality. It is a very heavy producer and a splendid variety for both home and market garden; grows about 3½ feet high.

D. & H. Improved Claudis.

PEPPER

CULTURE—Sow in hotbeds in February or March and transplant outside in May 18 inches apart in 3-foot rows. When the ground becomes warm the seed can be sown outside and transplanted as above. A good garden fertilizer, if worked into the soil when plants are 6 ins. high, will materially increase the yield. 1 oz. will produce about 1,200 plants.

CRIMSON GIANT. One of the earliest of the very large sweet varieties; fruits oblong, three lobed, 5 inches long by $3\frac{1}{2}$ inches in diameter; very mild, thick flesh.

ROYAL KING. Vigorous and productive, ripening large attractive fruits early in season; fruits deep green when young; flesh sweet, very thick, mild and fine flavored.

RUBY GIANT. A cross between Chinese Giant and Ruby King; fruits 4 lobed, 5 inches long by $3\frac{1}{2}$ inches in diameter; flesh thick and mild.

CHINESE GIANT. One of the very largest of the mild varieties.

OSHKOSH. A very distinct, large variety, during the growth pods are a rich deep glossy green, making an attractive sort to market as green peppers, the fruits are smooth and about $4\frac{1}{2}$ inches long and $3\frac{1}{2}$ in diameter, it is very productive and exceptionally sweet. Pods yellow when matured.

PIMENTO. A very thick flesh, heart-shaped, smooth, mild variety.

LONG RED CAYENNE. Fruits often curved and twisted; bright red, hot and pungent.

Harris Early Giant Pepper.

HARRIS EARLY GIANT. The earliest large sweet pepper and also very prolific. The plants are of vigorous growth, the peppers deep green turning to bright red and are $4\frac{1}{2}$ to 5 inches long and about $3\frac{1}{2}$ inches in diameter. Flesh thick and sweet.

PUMPKIN

CULTURE—Sow in good soil in May when the ground has become warm in hills 10 feet apart each way or in fields of corn about every third or fourth hill, very often planted at the same time with the corn. 1 oz. for 25 hills, about 1 lb. to acre.

KENTUCKY FIELD. The most popular of all varieties for stock feeding and canning. Deep yellow in color, meat thick and grows to large size.

KING OF MAMMOTH. A very fine flavored pumpkin, being well adapted to this climate; very large meat, thick, outside deeply ribbed.

STRIPED CASHAW. Very large with solid crooked neck, very delicious for table when cooked and served like sweet potatoes. Flesh light yellow, very thick and sweet.

RHUBARB, or PIE PLANT

CULTURE—Plants can be easily grown in any good garden soil. Sow seeds thinly in drills 18 inches apart, thin to 4 or 5 inches. Two-year-old roots are generally preferred for the home garden. A dozen good plants is usually sufficient for the average family. The roots should be set 4 feet each way in deep, warm and very rich soil. The more manure the better stalk.

MYATT'S VICTORIA. Regarded as the best variety for market and home garden. Stalks are red and of immense size.

SALSIFY, or OYSTER PLANT

CULTURE—Treat about the same as carrots except that Salsify is hardier and may be left in the ground all Winter. Sow in the early Spring after the ground has become warm in drills 14 inches apart and thin out to 4 inches in the row. Cover seed about 1 inch. 1 oz. to 75 feet; 5 lbs. to the acre.

MAMMOTH SANDWICH ISLAND. This variety is large and strong, growing with smooth, almost white tapering roots, has a mild and delicate flavor. The best sort for market gardener.

Mammoth Sandwich Island Salsify.

B. & H. RADISHES

CULTURE—Sow in drills as soon as the frost is out of the ground. They should be thinned out to stand 2 inches apart in the row, rows about 12 inches apart. They may be sown successively until the last of August. 1 oz. of seed to 100 feet of drill.

White Tip Sparkler.

B. & H. EARLY SCARLET FORCING. The earliest of the forcing radishes. Is almost perfectly round, bright scarlet and with smallest possible top. We highly recommend this variety for forcing under glass.

EX. ELY. SCARLET GLOBE. This is a very popular variety with market gardeners in many sections. It is a little longer than round, bright scarlet in color with a very small top and root. It is highly recommended both for forcing and outdoor planting. The flesh is firm, crisp and tender.

LONG BLACK SPANISH. Is especially adapted for winter use, it is late maturing and very hardy. The roots are almost black, long and thick. Flesh white and very firm.

PHILADELPHIA WHITE BOX. One of the best of the White varieties either for forcing or out-door culture. More round than turnip-shaped; always crisp, fine grained and tender.

CRIMSON GIANT. Very large, but never pithy. Globe shaped and one of the best red radishes for outdoor culture.

NON PLUS ULTRA. Round, rather turnip shape, of medium size with a moderate top, bright scarlet, very early, one of the best forcing varieties, coming in 3 to 4 days after B. & H. Early Scarlet Forcing.

THE NEW FELINS TYING MACHINE

Bunches Radish in a Hurry.
Saves Time and Labor.

SPARKLER WHITE TIP. Quite similar to Scarlet Turnip White Tip as to size and time of maturity, the root however is more round or ball shape. The white extends further upon the radish and on this account is more popular in many markets.

ROUND SCARLET CHINA. A very large, all season radish, skin is bright scarlet, flesh white and solid and does not get pithy.

CINCINNATI MARKET. Improved strain of Long Scarlet, being slightly larger and with a very small top, roots 6 to 7 inches long, scarlet color, flesh white, almost transparent, brittle and crisp.

CHARTIER LONG SCARLET. Roots 6 to 7 inches long and rather thick, deep scarlet at top shading off to pure white at tip.

GOLDEN GLOBE SUMMER. A special variety for late spring or summer planting. Roots are uniformly globe shaped with skin of a golden yellow color.

B. & H. Early Scarlet Forcing.

WHITE ICICLE. The leading long white radish and one of the earliest. The roots are about 6 inches long, white, slender and smooth.

WHITE STRASBURG. Roots are about 5 inches long, thick at the shoulder and abruptly tapering, skin and flesh are pure white, remains firm and brittle longer than most varieties.

WOOD'S EARLY FRAME. Very early, roots smooth, tender, uniform in shape, about 6 inches long and of a bright carmine red color.

SPINACH

CULTURE—For Spring and Summer use, sow in drills 1 foot apart and 1 inch deep as early as the ground can be worked and every two weeks up to the middle of May.

B. & H. Selected Bloomsdale Spinach.

B. & H. LATE SEEDING BLOOMSDALE.

A new strain of outstanding merit. It is just as early and quick growing as the old Bloomsdale, but it will stand in marketable condition 10 to 14 days longer before bolting. One of the advantages is that the inferior early shooting male plants are entirely lacking. It is intensely crumpled and blistered and very uniform. The color is a deep glossy green. Wherever Bloomsdale is grown, this improved strain will give far more satisfactory results.

B. & H. SELECTED BLOOMSDALE. Very early and hardy, plant of upright growth with a tendency to go quickly to seed in hot weather, color glossy deep green, favorite variety for both home and market garden.

NEW ZEALAND. A distinct type of spinach, the plants grow in branching form, with thick, succulent leaves. The leaves and stems can be gathered at any time after they are well grown and plant will start out into new growth.

PRINCESS JULIANA. A long standing or late seeding spinach, and wonderfully uniform in type and most attractive in appearance. In form it is a dense, compact rosette with very short petioles. The leaves are large and rounded. Thick in texture; very much blistered and crumpled and of an intense very dark green color.

NOBLE'S GIANT. A very large, thick leaved variety, somewhat wrinkled and arrow-shaped; dark green in color; exceedingly slow to shoot to seed.

BLIGHT-RESISTANT BLOOMSDALE. A very rapid growing variety of Bloomsdale and bred for disease resistance.

SQUASH

Summer Varieties

CULTURE—Sow after the danger of frost when the ground has become warm, plant 5 or 6 seeds in hill 4 feet each way. This applies to bush varieties. For the Winter or vine varieties, hills should be 8 feet each way. When well up they should be thinned out to two plants. 1 oz. for about 40 hills, 1 lb. to the acre.

B. & H. SUPERIOR WHITE BUSH. This is a carefully bred strain of the Early White Bush that runs uniform in size, shape and color, which is not true of the regular stock of this variety.

EARLY WHITE BUSH. Very early summer squash with fruit flattened, scalloped, entirely smooth on the surface and creamy white in color.

GOLDEN CUSTARD. Very similar in habit of growth to the Early White Bush, color beautiful golden yellow, slightly scalloped, fruits large.

GOLDEN SUMMER CROOKNECK. A standard and early productive summer sort, fruits moderately warted and of a bright yellow color.

B. & H. Superior White Bush.

Winter Varieties

TABLE QUEEN. A small winter squash, with excellent qualities, about the size of a coconut, dark green in color, changing to a bright golden after picking and storing. The meat is dry and mealy, and requires only about 20 minutes to bake.

WARTED HUBBARD. Fruits are large size, rough, skin dark green in color, flesh is bright orange, fine grained, rich and dry, the vines are strong and make a robust growth. A splendid keeping variety.

B. & H. TOMATOES

CULTURE—For early tomatoes sow seed in hot beds during the latter part of February or the 1st of March. When plants are about 3 inches high, transplant into cold frames, setting plants about 4 inches each way. Paper plant bands can be used to advantage for this purpose, and when transplanted to the open ground after danger of frost, the root system would not be disturbed. If the tap root is not broken, will continue to bear much longer. For main or Fall crop, seed can be sown in the open ground from the 10th of May until the 1st of June and transplanted where they are to remain, 3 to 4 feet apart each way. More perfect and better fruits can be had if plants are well staked. 1 oz. will produce about 1,500 plants; requires 4,000 plants to the acre.

New Marglobe—(Disease Resistant).

MARGLOBE (NEW). A second early disease resistant, red fruited variety introduced by the U. S. Department of Agriculture. The fruits are large, smooth and globular, meaty and almost coreless; the plants are medium large and erect. Its foliage shading the fruit and preventing sun scald. It is very productive and well adapted to truck growing, shipping and as a canning sort.

B. & H. BONNY BEST. A very popular extra early variety, smooth, solid and uniform, producing in clusters in center of plant. Fruits ripen uniformly and very productive of medium sized fruit of bright red color.

EARLIANA. The earliest and best of the very early tomatoes, fruit of fair size, round, very smooth and solid and produced in clusters in center of plant, color a bright scarlet.

FLORIDA SPECIAL. A second early scarlet fruited variety, it is very similar to Bonny Best. Fruits are round, high crowned and small to medium size, set in clusters of from three to five, the fruit have from 3 to 4 seed cells, the vine does not make a heavy growth.

EARLY DETROIT. A very fine, early, large fruited, pink variety, a little larger than Beauty and somewhat earlier, fruits nearly globe shape and very uniform in size, free from crack and does not blight easily, smooth and solid.

GULF STATE MARKET. An early globe fruited variety, high crowned medium size and perfectly smooth, also solid and meaty and have a thick skin and set in clusters of from 5 to 7. vines make good growth, and have rather heavy set foliage.

BEAUTY. A productive main crop variety, fruits large and exceptionally smooth, of excellent quality, color purplish pink.

B. & H. Bonny Best.

B. & H. TOMATOES—Continued

CHALK'S JEWEL. A fine early variety, about a week later than Earliana, fruits smooth, round and solid, color crimson.

JOHN BAER. An extra early, red fruited variety, fruits are large and nearly round, smooth and of good quality. It is now one of the most popular varieties with the market gardeners.

DWARF CHAMPION. Of a distinctly dwarf, compact upright growth, fruits smooth, solid and of medium size, color, pink, quite early.

NORTON. This is wilt-resistant variety, scarlet fruited and very similar to Stone, being a selection from that strain, the fruits are smooth and solid, bears well and gives a good crop, vines make a medium to heavy growth.

MATCHLESS. A very dependable, large, smooth, second early sort, makes a good canning variety, color cardinal red.

TRUCKER'S FAVORITE. A main crop pink fruited variety, fruits medium size and rather flattened in shape and very solid, the vines make a strong heavy growth.

GREATER BALTIMORE. A main crop, productive, red fruited variety of the Matchless type. A splendid canning variety.

PONDEROSA. An exceptionally large but perfect pink tomato and for home use one of the best, fruits very solid with few seeds, ripens early and bears well until very late. This variety is often referred to as Beefsteak Tomato.

STONE. A standard and general favorite with truckers and canners, very vigorous and productive, fruits round, large, solid, smooth and deep red in color.

BRIMMER. A very large tomato somewhat similar to the well known Ponderosa but larger. Its fruit is solid, meaty, well flavored, with few seed. Is rich red in color and unusually smooth for a large tomato.

JUNE PINK. The earliest of the pink or purple fruited tomatoes. It is very similar in productiveness and habit of growth to the well-known Earliana.

YELLOW PEAR. About same size as Yellow Plum, differing only in shape.

YELLOW PLUM. A small fruited variety. Splendid for preserving.

GOLDEN PONDEROSA. Equal in size to purple Ponderosa.

TOBACCO

ROOT-ROT RESISTANT BURLEY. A very fine strain, developed from the Standup White Burley. As the name implies, it is bred to resist the root-rot disease. The plant is large and spreading, leaves are wide and smooth with small ribs. When properly cured up it makes one of the finest Burley varieties.

TURNIP PURPLE TOP WHITE GLOBE

TURNIPS

CULTURE—For Spring crop sow in drills 12 to 18 inches apart, cover seed $\frac{1}{2}$ inch and thin out 4 inches in the row. For Fall and Winter crop, sow in July or August in drills or broadcast. 1 oz. will drill about 250 feet, 1 lb. to the acre.

EXTRA EARLY PURPLE TOP MILAN. Extremely early and of splendid quality, bulbs of medium size, flat and white with a bright purple top. Favorite variety with market gardeners for early spring bunching.

B. & H. PURPLE TOP WHITE GLOBE. The most widely cultivated and best known variety; almost a perfect globe in form; flesh and skin white, colored purple or red above ground; very fine grained and sweet.

PURPLE-TOP STRAP LEAVED. A very early, productive sort; roots flat, large size; purple or dark red above ground, white below; flesh white, tender and fine grained.

SEVEN TOP. Grown exclusively for the tops, which are used like Kale for Greens.

IMPROVED PURPLE-TOP YELLOW RUTABAGA. The most desirable sort for table use or stock feeding. Roots are somewhat of a globe shape and grow to large size.

This list will be found to contain only sorts that have real merit and can be grown in any garden, and is mostly composed of annuals, biennials and perennials. Annuals bloom and ripen their seeds the first year, biennials bloom the second year, perennials bloom several years in succession. Many will bloom the first year if seeds are started early in the spring.

AGERATUM

Grows quickly and flowers freely. Is fine for large beds and useful as a cut flower.

AGERATUM MEXICANUM BLUE. Is very showy, growing about 2 feet tall, filled all during the summer and fall with clusters of bright Azure Blue Flowers. Pkt. 10c; $\frac{1}{4}$ oz. 25c.

AMARANTHUS

CANDATUS (Love Lies Bleeding). Grows about 3 feet high, with drooping red spikes. Pkt. 10c.

TRICOLOR (Joseph's Coat). 2 $\frac{1}{2}$ ft. A color combination of dark bronze, green, scarlet and gold. Pkt. 10c.

ALYSSUM

Easily grown annual, fine for beds, edging or for cutting. Pure white flowers and noted for their exquisite fragrance, this continuing from early spring until hard frost.

SWEET SCENTED. Pkt. 5c; $\frac{1}{2}$ oz. 25c.

LITTLE GEM. Very dwarf and completely covered with snow-white blossoms. Pkt. 10c; $\frac{1}{4}$ oz. 25c.

Antirrhinum (Snapdragon)

Aquilegia (Columbine).

ANTIRRHINUM (Snapdragon)

In recent years this flower has become immensely popular, both for cutting or for show in the garden; the beautifully colored flowers are borne on long stems and continue blooming from July until killed by frost.

Tall Maximum Giant Flowering Blossoms.

2 to 2 $\frac{1}{2}$ inches across.

Separate varieties:

APPLE BLOSSOM. Rosy pink, yellow lip.

CANARY BIRD. Canary yellow, golden yellow center.

COPPER KING. Velvety copper scarlet.

OLD GOLD. Deep golden yellow.

SNOWFLAKE. Pure white, yellow tube.

THE ROSE. Rose pink.

BUNCH OF LILAC. Lilac purple.

GIANT FLOWERING. Finest mixed.

Each of above: Pkt. 15c; $\frac{1}{8}$ oz. 75c.

Medium Tall Large Flowered, 18 to 20 inches.

PHILADELPHIA PINK. Pure pink. Pkt. 15c; $\frac{1}{8}$ oz. 75c.

GLORIA. Rich deep rose pink. Pkt. 15c; $\frac{1}{4}$ oz. 80c.

PEERLESS PINK. Cameo pink. Pkt. 15c; $\frac{1}{8}$ oz. 75c.

GOLDEN QUEEN. Clear yellow. Pkt. 10c; $\frac{1}{4}$ oz. 50c.

MEDIUM TALL FINEST MIXED. Pkt. 10c; $\frac{1}{4}$ oz. 50c.

FINEST MIXED. Pkt. 10c; $\frac{1}{2}$ oz. 60c; 1 oz. \$1.00.

AQUILEGIA (Columbine)

The Columbine is one of the most beautiful hardy perennials, producing graceful spurred flowers on stems rising about 2 feet above the beautiful foliage. They are highly prized for cut-flower purposes as well as brightening up the flower garden. The period of flowering covers the late spring and early summer months.

ROCKY MOUNTAIN COERULA. One of the most beautiful of our native American flowers. Blossoms blue and white. Pkt. 10c; $\frac{1}{2}$ oz. 60c.

Aster (California Giants).

ASTERS

Possibly the most popular annual flower grown. It is an annual that is easy to grow, has wonderful lasting qualities, both in the garden and as a cut-flower.

AMERICAN BRANCHING

Azure Blue, Crimson, Lavender,
Peerless Pink, Deep Rose, and Pure White.

Any of above: Pkt. 10c; $\frac{1}{8}$ oz. 35c.

Finest Mixed. Pkt. 10c; $\frac{1}{8}$ oz. 25c.

Corn Flower (Centaurea Cyanus).

IMPROVED CALIFORNIA GIANTS. A comparatively new Aster of Crego or Ostrich Feather type. Flowers much larger and more substantial than Improved Crego. They measure 5 to 6 inches in diameter, and stand up well when shipped as cut flowers. Their immense size and beauty, as well as their long and sturdy stem, make them very attractive when arranged in floral work.

White Peach Blossom Light Blue
Light Purple Deep Rose Dark Purple
Mixed All Colors

Each of above: Pkt. 15c; $\frac{1}{8}$ oz. 65c.

BALSAM

CAMELIA FLOWERED. A quick growing annual producing large, brilliantly colored flowers. Plants grow 15 to 20 inches high, blossoms are borne along the stem. This mixture is composed of the choicest assortment of all the best varieties and colors. Double mixed. Pkt. 5c; $\frac{1}{2}$ oz. 50c.

BALSAM PEAR

A very handsome climbing annual, grown mostly for the ornamental colored fruit which when ripe opens, showing crimson interior. Pkt. 10c.

Calendula Mixed.

BEGONIA

Everblooming Bedding Varieties

A splendid annual for bedding. The flowers, though small, are of brilliant colors, and borne in great profusion from summer to autumn.

GRACILIS LUMINOSA. Large bright scarlet flowers. Dark leaf. Pkt. 25c; $\frac{1}{32}$ oz. \$3.50.

PRIMA DONNA. Brilliant clear pink, shading to carmine rose. Pkt. 25c; $\frac{1}{32}$ oz. \$3.50.

CALENDULA

Free flowering, hardy annual, growing about 12 to 18 inches high. It is a very fine flower for cutting, also for border. Begins blooming early in the summer, continues until killed by frost.

ALL COLORS MIXED. Pkt. 5c; $\frac{1}{2}$ oz. 25c.

BALL'S ORANGE. Very carefully selected strain, produces dark orange blossoms measuring 3 inches across, stems about 18 inches high. This is a very valuable strain for florists. Pkt. 15c; $\frac{1}{8}$ oz. 50c.

CALLIOPSIS

A very hardy and easily grown annual. Its blossoms vary in color from a pale yellow to a rich orange and velvety brown, grows on thin wiry stems a foot to 18 inches high. Can be used effectively anywhere in beds, borders or masses. Blooms throughout the summer and is excellent for cutting. Seeds can be sown very thinly when the weather becomes warm.

GOLDEN YELLOW. Pkt. 10c; $\frac{1}{2}$ oz. 50c.

DWARF VARIETIES Mixed. Pkt. 5c; oz. 35c.

DOUBLE MIXED. Pkt. 10c; oz. 35c.

CAMPANULA (Canterbury Bells)

A very beautiful and showy perennial, growing about three feet tall, and covered with large bell shaped flowers. **Single Mixed**—Pkt. 10c; $\frac{1}{4}$ oz. 25c.

CANDYTUFT

Popular small annual for general planting. It produces a profusion of flowers in clusters in white, red and purple. Grows from 12 to 18 inches high and is fine for edging or massing in beds. Sow seeds $\frac{1}{2}$ inch deep in beds during May. Thin out to 6 inches apart.

EMPRESS. Large pure white. Pkt. 5c; $\frac{1}{2}$ oz. 50c.

CHOICE MIXED. Pkt. 5c; $\frac{1}{4}$ oz. 25c.

Early Flowering Mammoth Cosmos.

CARNATION

A very popular flower, successfully grown in the open ground. They are very easy to grow and make a fine bedding plant, coming into full bloom about four months from sowing and continues until hard frost.

MARGUERITE MIXED. Pkt. 10c; $\frac{1}{4}$ oz. 50c.

CENTAUREA

CORNFLOWER (Cyanus). Commonly known as Bachelor's Button. This flower grows in most any garden and blooms continuously; is an annual and will usually reseed itself. Colors are mostly blue, rose and white. Pkt. 5c; oz. 50c.

EMPEROR WILLIAM. Blue. Pkt. 10c; $\frac{1}{2}$ oz. 35c.

DOUBLE BLUE. Pkt. 10c; $\frac{1}{2}$ oz. 50c.

GYMNOCARPA (Dusty Miller). Pkt. 10c; $\frac{1}{2}$ oz. 50c.

Candytuft.

MOSCHATA MIXED (Sweet Sultan). White, Red, and Blue. Pkt. 10c; $\frac{1}{4}$ oz. 40c.

SUAVEOLENS (Sweet Sultan). Yellow. Pkt. 10c; $\frac{1}{4}$ oz. 40c.

CHILDSI (Chinese Woolflower)

Plant grows 2 to 3 feet high, the bloom starting early with a central head; scores of branches are thrown out, each bearing a wool-like blossom.

MIXED COLORS. Pkt. 10c.

**CHRYSANTHEMUM (Hardy Daisy)
(Shasta Daisy)**

A hardy perennial, fine for border plants; has wonderfully large flowers on stout stems borne in great profusion all summer. **Hybridum.** Pkt. 10c.

CLARKIA

A very popular hardy annual with delicate but very brilliant shades of rose, white and purple flowers, borne profusely on plants 18 to 24 inches high.

DOUBLE MIXED. Pkt. 10c.

COCKSCOMB

A very attractive annual, producing flowers resembling a cock's comb. These may be started under glass or sown directly in the garden.

GLASGOW PRIZE. Brilliant crimson, growing about 9 inches high, and makes an admirable pot plant. Pkt. 10c; $\frac{1}{8}$ oz. 85c.

TALL MIXED. Pkt. 10c.

Shasta Daisy.

Delphinium (Perennial Larkspur).

COLEUS

Possibly the most handsome foliage plant obtained from seed. Large heart-shaped leaves, in varied color combinations.

LARGE LEAVED MIXED. Pkt. 15c.

COREOPSIS

A showy perennial, growing in clumps, spreading each year; blossoms through summer and fall months profusely.

CALIFORNIA SUNBEAMS. Pkt. 10c; ½ oz. 25c.

COSMOS

A very satisfactory tall growing hardy annual. Elegant plant for background or along fences. Plants grow about 6 feet high and come in bloom in midsummer and autumn. The double crested is a new type that develops the crown or crest in center. Its petals are much the same as in the old type.

EARLY FLOWERING MAMMOTH. Pkt. 10c; ¼ oz. 25c.

Separate colors of Crimson, Pink, White. Either: Pkt. 10c; ¼ oz. 35c.

DOUBLE CRESTED or ANEMONE FLOW-ERED. Pkt. 15c; ½ oz. 60c.

CYPRESS VINE

A beautiful rapid growing annual climber, with dark green finely cut fern-like foliage and star-shaped scarlet and white flowers.

PURE WHITE. Pkt. 10c; ½ oz. 25c.

MIXED. Pkt. 10c; ½ oz. 25c.

DELPHINIUM (Perennial Larkspur)

Recent improvement in size and color of this flower has made it one of the most brilliant and effective of hardy garden plants. The large flowering spikes that are raised freely over their decorative foliage often reach up 2 feet or more.

BELLADONNA. Sky blue flowers with light centers. Pkt. 15c; ½ oz. 70c.

BELLAMOSA. Very similar in growth to the Belladonna, differing only in having dark blue flowers. Pkt. 15c; ½ oz. 70c.

CARDINALE. Brilliant scarlet. Pkt. 15c; ½ oz. 70c.

WREXHAM STRAIN (Hollyhock Delphinium). Pkt. 25c; 1/16 oz. 75c.

DIANTHUS or PINKS

A free blooming hardy annual, flowers somewhat resemble carnations. Very easily grown and has a place in most every garden.

LACIANIATUS DOUBLE MIXED. Pkt. 5c; ¼ oz. 25c.

LARGE FLOWERING SINGLE MIXED. Pkt. 5c; ¼ oz. 25c.

DIGITALIS (Foxglove)

A hardy perennial, producing species of beautiful tubular shaped blossoms. The plants grow 3 to 4 ft. high, and are splendid for shrubby borders.

MIXED COLORS. Pkt. 10c; ½ oz. 50c.

DOLICHOS or HYACINTH BEAN

Fine annual climber, is a rapid grower and stands the summer heat well. The purple and white flowers are borne in clusters something like the Hyacinth. Plant the seed in the open ground as soon as weather is warm. Pkt. 10c; ½ oz. 40c.

FOUR O'CLOCK or MIRABILIS

A well known, old fashioned, free blooming flower. Grows about 2 feet high, opening in the late afternoon and through the night. Flowers are very showy and fragrant.

ALL COLORS MIXED. Pkt. 5c; oz. 20c.

Digitalis (Foxglove).

GAILLARDIA

A hardy perennial that blooms the first year. Splendid for beds and borders. Produces gaily colored flowers of scarlet and orange from early summer until fall. Flowers will often measure three inches or more across. Plant about 18 inches high.

GRANDIFLORA MIXED. Pkt. 10c; $\frac{1}{8}$ oz. 35c.

GODETIA

A very attractive hardy annual, growing about 18 inches high. The plants bloom profusely and bear showy flowers of satiny texture in many rich and varied colors.

TALL MIXED. Pkt. 10c; $\frac{1}{8}$ oz. 25c.

GOMPHRENA (Globe Amaranth)

A showy annual everlasting. The clover like heads when dried make a very beautiful winter bouquet. **MIXED COLORS.** Pkt. 10c.

Helichrysum or Strawflower.

GOURDS, ORNAMENTAL

Where a very heavy quickly grown vine is wanted, these are very often desirable.

MIXED. Pkt. 10c.

GYPSOPHILA (Baby's Breath)

A graceful free flowering plant, covered with white blossoms, valuable for use in trimming in bouquets, also hanging baskets, or edgings.

COVENT GARDEN STRAIN. An improved large flowering pure white form of the annual Baby's Breath. Pkt. 10c; $\frac{1}{8}$ oz. 25c.

PERENNIAL (Single White). Pkt. 10c; $\frac{1}{8}$ oz. 35c.

HELICHRYSUM (Strawflower)

The most attractive of the everlasting flowers, they are very desirable to use in bouquets of dried flowers. If picked before they are entirely open and hung heads down in a cool place until thoroughly dry, makes admirable bouquet for basket or vase. They grow 2 to 3 feet high and bloom latter part of Summer.

DOUBLE MIXED. Pkt. 5c; $\frac{1}{8}$ oz. 35c.

Hollyhocks (Double Mixed).

HELIOTROPE

A very popular flower on account of its delightful fragrance. The plant grows about 2 ft. tall. Seeds should be started for summer blooming indoors. It is a very desirable pot plant for the house during winter.

B. & H. MIXED. Pkt. 10c.

HOLLYHOCK

A very popular hardy perennial grown everywhere and valuable as a background or for border. Requires a rich and well drained soil.

CHATTER'S DOUBLE MIXED. Pkt. 10c; $\frac{1}{8}$ oz. 50c.

HYBRIDS, SINGLE MIXED. Pkt. 10c; $\frac{1}{8}$ oz. 35c.

**KOCHIA (Mexican Fire Bush;
Summer Cypress)**

An annual, growing in bush form from 2 to 2½ feet. Light green in spring, deepening in color as the summer advances until the whole plant is of a crimson hue. Pkt. 5c; $\frac{1}{8}$ oz. 20c.

Annual Larkspur.

Kochia.

Mignonette.

Morning Glory.

Pansies.

LANTANA

A tender perennial about two feet high, having somewhat of a small shrub appearance, with verbena-like flowers in shades of white, red and yellow during late summer and autumn.

Start seeds under glass and transplant into pots or open ground after danger of frost.

BRUANT'S DWARF HYBRIDS MIXED. Pkt. 10c; $\frac{1}{2}$ oz. 60c.

LARKSPUR, ANNUAL

An old-fashioned flower having long, slender spikes ranging in beautiful shades of blue. Excellent for border or to be used as cut flowers. Do well in most any garden.

DOUBLE TALL MIXED. Pkt. 5c; $\frac{1}{4}$ oz. 20c.

DOUBLE STOCK FLOWERED. Exquisite pink. Pkt. 15c; $\frac{1}{2}$ oz. 35c.

LOBELIA

A very dwarf, half hardy annual plant forming compact little bushes about 6 inches high and fairly covered with blooms throughout the season, being well adapted for bedding, pots, edgings or rockeries.

GRACILIS. The flowers are bright blue with small white centers. Pkt. 10c; $\frac{1}{4}$ oz. 50c.

EMPEROR WILLIAM. Clear sky-blue with green foliage. Pkt. 10c; $\frac{1}{2}$ oz. 50c.

LUPINUS

A very attractive free flowering annual with graceful spikes of fragrant pea-shaped blossoms of rich and various colors. Is suitable for beds, borders and for cutting.

EXTRA DWARF MIXED. Pkt. 10c; $\frac{1}{4}$ oz. 50c.

TALL ANNUAL MIXED. Pkt. 5c; $\frac{1}{4}$ oz. 25c.

MARIGOLD

A free flowering annual, blooming profusely all summer in pleasing shades of yellow and orange and with striking striped color combination. Can be sown directly in the garden. Very popular for beds and borders.

AFRICAN

Orange Prince. Double. Pkt. 10c; $\frac{1}{2}$ oz. 30c.

Eldorado. Golden yellow. Pkt. 10c; $\frac{1}{2}$ oz. 30c.

Double Mixed. Pkt. 10c; $\frac{1}{2}$ oz. 25c.

FRENCH

Tall Double Mixed. Pkt. 5c; $\frac{1}{4}$ oz. 25c.

MIGNONETTE

Hardy annual of delightful fragrance. Plant seed in open ground in spring. For succession until frost sow seed again in July. Thin out about 6 inches.

ODORATA GRANDIFLORA (Sweet). Large flowered, very sweet. Light yellowish white. Pkt. 5c; $\frac{1}{4}$ oz. 15c.

MACHET. Dwarf, vigorous plants of pyramidal growth. Large spikes of red flowers. Pkt. 10c; $\frac{1}{4}$ oz. 40c.

MOON FLOWER

A popular and rapidly growing annual climber.

LARGE WHITE. Pkt. 10c; $\frac{1}{2}$ oz. 50c.

LARGE BLUE. Pkt. 10c; $\frac{1}{2}$ oz. 25c.

MORNING GLORY

A very popular annual climber; grows rapidly and will attain a height of 15 feet. The flowers are of immense size and a gorgeous array of varied colors.

JAPANESE MIXED. Pkt. 10c; $\frac{1}{4}$ oz. 25c.

MYOSOTIS (Forget-Me-Not)

An old-fashioned half hardy perennial, bearing in profusion clusters of dainty blue blossoms, especially in fall and spring. It thrives well in the shade or open border, but flourishes best in a moist, shady place. Seed should be sown under glass in February or March for blossoms the first year.

ALPESTRIS BLUE. Trailing habit. Pkt. 10c; $\frac{1}{8}$ oz. 25c.

NASTURTIUM

A very popular annual; can be found in most every garden in the dwarf or climbing varieties. Profuse bloomers from the early summer until late fall. Our mixtures contain all the best varieties; affords a striking combination of colors.

DWARF MIXED. Pkt. 5c; $\frac{1}{2}$ oz. 10c; oz. 15c; $\frac{1}{4}$ lb. 40c; lb. 85c.

TALL MIXED. Pkt. 5c; $\frac{1}{2}$ oz. 10c; oz. 15c; $\frac{1}{4}$ lb. 40c; lb. 85c.

Nasturtiums.

Shirley Poppies.

Phlox.

Giants of California Petunia.

NICOTIANA

An easy annual to grow and one of the most effective. The blossoms resemble petunias very much in shape, but with longer tube. The flowers become fully expanded only in the morning or evening or on cloudy days. Plants 2 to 3 feet.

AFFINIS HYBRIDS. Pkt. 10c; $\frac{1}{8}$ oz. 25c.

PANSIES

These thrive best in a rich soil, especially where it is partially shaded. For early spring blossoms, the seeds should be sown from July to September and transplanted into coldframes for the winter.

GIANT TRIMARDEAU MIXED. One of the most popular, with large sized blossoms containing every color and combination of colors known to the Pansy family. Pkt. 10c; $\frac{1}{8}$ oz. 40c; oz. \$3.00.

B. & H. MAMMOTH EXHIBITION MIXTURE. A wonderful mixture of mammoth pansies especially recommended to the commercial grower. Pkt. 25c; $\frac{1}{4}$ oz. \$1.25; oz. \$8.00.

B. & H. GIANT MIXTURE. We consider this the most gorgeous mixture of all Pansies. All of the flowers are of the giant type with a wonderful color combination. Pkt. 40c; $\frac{1}{8}$ oz. \$2; oz. \$14.00.

PETUNIA

GIANTS OF CALIFORNIA. This is a very wonderful strain. The flowers are very large, often 5 to 7 inches across. The edges are beautifully frilled. The brilliancy of colors cannot be surpassed.

B. & H. MIXED COLORS. Pkt. 25c.

Oriental Poppy.

Single Dwarf Varieties

This type has very neat compact plants blooming profusely all during summer. Blossoms small and richly colored.

MULTIFLORA. Extra fine dwarf mixed. Pkt. 15c.

For harmonious bedding and for border effects, we offer the following separate varieties:

ROSE OF HEAVEN. Brilliant rose. Pkt. 20c; $\frac{1}{8}$ oz. 75c.

SNOWBALL. Pure satiny white. Pkt. 15c.

ROSY MORN. Clear pink. Pkt. 20c; $\frac{1}{8}$ oz. 75c.

ALDERMAN. Deep violet. Pkt. 25c; $\frac{1}{16}$ oz. 75c.

PHLOX DRUMMONDI

This is an annual that makes a magnificent show in beds and masses, where their brilliant and varied colors produce a gorgeous effect from a few weeks after sowing throughout the summer. They are very easily grown. The seeds should not be sown until danger of frost is over.

MIXED COLORS. Pkt. 10c; $\frac{1}{4}$ oz. 40c; 1 oz. \$1.00.

SINGLE SMALL FLOWERING. Choice mixed. Pkt. 10c; $\frac{1}{16}$ oz. 25c.

PERENNIAL NEW HYBRIDS. Mixed. Pkt. 15c; $\frac{1}{8}$ oz. 50c.

POPPIES

No flower affords a more pleasing display of gorgeously brilliant coloring during the blooming season. They are very hardy and can be sown as early in the spring as the ground can be worked.

CALIFORNIA or ESCHSCHOLTZIA. A very hardy free flowering annual, growing about 15 inches high, producing quantities of beautiful blooms in shades of yellow, orange and red. Pkt. 5c; $\frac{1}{4}$ oz. 15c; oz. 50c.

PEONY FLOWERED. Enormous size, perfectly double, resembling a peony. Mixed all colors. Pkt. 5c; oz. 35c.

SHIRLEY. A magnificent variety producing through a long season large flowers of charmingly delicate colors, most all with white centers.

Fordhook Hybrids. Single mixed. Pkt. 10c; $\frac{1}{8}$ oz. 30c.

Semi-Double. Mixed. Pkt. 10c; $\frac{1}{8}$ oz. 25c.

ORIENTAL. A perennial producing enormous flowers, often more than 6 inches in diameter.

Scarlet. Pkt. 10c; $\frac{1}{8}$ oz. 35c.

Brilliant. Dark red. Pkt. 10c; $\frac{1}{8}$ oz. 50c.

Hybrids Mixed. Pkt. 10c; $\frac{1}{8}$ oz. 50c.

PORTULACA

A desirable annual used extensively for massing in beds or border. They produce throughout the season innumerable flowers of richest colors.

SINGLE MIXED. Pkt. 5c; $\frac{1}{8}$ oz. 25c.

DOUBLE MIXED. Pkt. 10c; $\frac{1}{8}$ oz. 50c.

PYRETHRUM

A half-hardy perennial, often treated as an annual. Has wonderful lasting qualities as a cut-flower. The colors are pleasing shades of pink and rose. Blossom formation somewhat similar to the daisy. Both foliage and flowers are very ornamental and well adapted for beds or borders.

GIANT FLOWERED SINGLE MIXED. Pkt. 10c; $\frac{1}{16}$ oz. 25c.

Portulaca Double.

RICINUS

An ornamental plant making a rank growth in one season; often attains height of 8 to 10 ft. Frequently used in garden borders as a prevention against moles.

ZANZIBARENSIS. Pkt. 5c; oz. 15c.

SALVIA (Scarlet Sage)

Annual ornamental plant that blooms throughout the late summer and autumn. It is somewhat compact growing from $1\frac{1}{2}$ to 3 feet high; upper part of the stem usually covered with brilliant flowers.

SPLENDENS. Tall scarlet. The long spikes of this variety are of a vivid scarlet, easy to grow, and the most popular of the Salvia. Pkt. 10c; $\frac{1}{4}$ oz. 75c; oz. \$2.50.

AMERICA (or Globe of Fire). Considered the best red and most continuous bloomer; very uniform in habit of growth. Pkt. 20c; $\frac{1}{8}$ oz. 65c; oz. \$4.00.

ZURICH. A dwarf early variety with large compact brilliant flower spikes. Pkt. 15c; $\frac{1}{8}$ oz. 50c; oz. \$3.25.

Salvia America.

SALPIGLOSSIS

A very showy and attractive annual with richly colored funnel- or petunia-shaped blossoms. Each flower regardless of color is beautifully veined or penciled. Blooms from August to October. The plants about 2 feet high.

GRANDIFLORA LARGE FLOWERING. Mixed. Pkt. 15c; $\frac{1}{16}$ oz. 35c.

SCARLET RUNNER BEANS

An annual climber, growing rapidly and bearing sprays of brilliant scarlet pea-shaped blossoms, desirable for ornamental purposes, however may be used either as a snap or shell bean for eating. Pkt. 10c.

Salpiglossis.

B. & H. LAWN AND GARDEN GROWER

Will add size and color to your flowers. Mix freely with the soil before sowing seeds or setting plants. See page 3.

Stocks.

STATICE

A very valuable plant, either for borders or rock gardens. The flowers are borne on graceful spreading stems. These if cut and dried in a cool place will retain its true color and last in perfect condition for months. (18 inch.)

SINUATA. Deep blue. (Annual.) Pkt. 10c; $\frac{1}{8}$ oz. 25c.

SINUATA. Mixed. (Annual.) Pkt. 10c; $\frac{1}{8}$ oz. 25c.

LATIFOLIA. Deep lavender. (Perennial.) Pkt. 10c; $\frac{1}{8}$ oz. 65c.

STOCKS

A popular annual that is easily grown, for massing or planting in mixed borders or for beds. They produce a great number of flowers of delightful fragrance. A splendid flower for cutting.

SPECIAL PERFECTION DOUBLE MIXED. A wonderful large-flowering variety containing all the very best of popular colors. Pkt. 10c; $\frac{1}{8}$ oz. 40c.

Single Mixed. Pkt. 5c; $\frac{1}{8}$ oz. 25c.

SUNFLOWER (*Helianthus*)

A very stately old-fashioned flower in new and improved varieties. The size and brilliancy of their flowers make good effect among shrubbery, also valuable for screening unsightly views and fences.

STELLA. The plant is spreading with many branches, attaining a height of about 5 feet; flowers well formed and of golden yellow color with black center. Pkt. 10c; $\frac{1}{4}$ oz. 25c.

DOUBLE CALIFORNIA. Rich golden yellow flowers, with green center. Pkt. 5c; $\frac{1}{4}$ oz. 15c.

SWEET WILLIAMS

A biennial growing from 1 to 1½ feet high. They produce masses of lovely brilliant, sweet-scented flowers throughout a long period; easily grown and very beautiful; plants of extreme richness; diversity of colors. They are very fragrant, and an excellent cut-flower.

SINGLE MIXED. Pkt. 5c; $\frac{1}{4}$ oz. 25c.

DOUBLE MIXED. Pkt. 10c; $\frac{1}{4}$ oz. 45c.

Sweet William.

A Border of Hardy Perennials.

Giant Verbena.

THUNBERGIA (Blackeyed Susan)

A beautiful climbing or trailing annual. It will trail over the ground forming a dense mat of foliage and flowers. Used extensively in hanging baskets, vases, on fences, etc. The colors range through all shades of yellow, orange, buff to pure white, mostly with black centers. (About 5 feet.)

ALL COLORS MIXED. Pkt. 10c; $\frac{1}{8}$ oz. 25c.

B. & H. Dahlia-Flowered Zinnias

An old time annual becoming immensely popular in recent years since the introduction of the new Dahlia Flowered, an improvement in color, size and form. Easily grown and makes a wonderful display in beautiful array of various colors in the garden; very fine for cut-flowers. Our strains of this wonderful flower are the very best that can be produced.

The Dahlia Flowered is a comparatively new Zinnia producing mammoth flowers measuring from 4 to 6 inches across; wonderful range of colors. Plants are strong and grow from 3 to 4 feet high. A bed of this new flower should be in every garden.

CHOICE MIXED (Dahlia - Flowered). Pkt. 15c; $\frac{1}{4}$ oz. 50c; oz. \$1.75.

B. & H. SPECIAL MIXTURE (Dahlia Flowered). Pkt. 20c; $\frac{1}{4}$ oz. \$1.00; oz. \$3.50.

SEPARATE COLORS

Any of the following varieties: Pkt. 25c; $\frac{1}{8}$ oz. 75c.

EXQUISITE. Light rose with centers deep rose.

OLD ROSE. A real old rose shade, very large, beautiful.

DREAM. A fine, deep lavender, turning to purple, a new and desirable shade in Zinnias.

GOLDEN STATE. A very rich orange yellow, turning to an attractive orange when in full bloom.

CRIMSON MONARCH. By far the largest and best of the red shades. Flowers often 8 inches in diameter.

POLAR BEAR. A very large pure white of true Dahlia form.

BUTTERCUP. Immense, deep creamy yellow.

CANARY BIRD. A delicate shade of primrose; very large and holds color well until out of bloom.

VERBENA

A hardy annual very valuable for bedding purposes, borders and window boxes.

Separate Colors of MAMMOTH, SCARLET, WHITE, or PURPLE. Each: Pkt. 10c; $\frac{1}{16}$ oz. 25c.

MAMMOTH MIXED. The colors in this mixture range from a snow white to several shades of pink and to deepest red. Pkt. 10c; $\frac{1}{8}$ oz. 20c.

VINCA (Periwinkle, or Old Maid)

Ornamental free blooming plant, with bright green shiny foliage with handsome pink and white flowers. One of the most satisfactory plants for bedding purposes. They may be potted and kept in bloom through the winter. Seeds should be sown early and then the plants will bloom the first year. (Seeds germinate slowly.)

MIXED. Pkt. 10c; $\frac{1}{8}$ oz. 25c.

WILD GARDEN**ANNUAL FLOWERING SEEDS**

A general mixture of the easiest and surest growing annual kinds, that may be sown broadcast, and with little care will produce a bright effect in places that would otherwise be nothing but a collection of unsightly weeds. Pkt. 10c; oz. 85c; $\frac{1}{4}$ lb. \$3.00.

LILLIPUT DOUBLE. A dwarf Zinnia, growing only about 12 inches high, and of a rather bushy habit, fairly covered with small short-stemmed very double flowers. They are very pretty plants, being in blossom throughout the summer and fall season.

Mixed Colors. Pkt. 10c; $\frac{1}{8}$ oz. 35c.

CALIFORNIA GIANTS. A special strain of Zinnias which produce flowers of colossal size, often measuring 5 to 6 inches across. They have a small flat center, with loosely placed petals. Plants are of robust habit, attaining a height of 3 to 4 feet. Pkt. 15c; $\frac{1}{4}$ oz. 50c.

FULTON'S Plantabbs ODORLESS PLANT FOOD TABLETS

PLANTABBS are the new, quick-acting, water soluble plant food and fertilizer in tablet form—and in just the right proportions to promote luxuriant foliage, and larger, prettier and more abundant blooms. Each tablet analyses 11 per cent Nitrogen (Ammonia), 15 per cent Phosphoric Acid, and 20 per cent Potash, which authorities agree is the perfect balance for a plant and flower fertilizer. Plantabbs are odorless, easy to use and inexpensive, and their action is quick and positive. 25c, 50c, \$1.00 and \$3.50 per package.

Sweet Peas

Most every one admires the Sweet Pea in its many shades of color with their beautifully frilled large fragrant flowers on long stems. It is a very easy flower to grow and to grow well.

EARLY FLOWERING SPENCER

A new race of Sweet Peas that is becoming more popular each year. The blossoms are equal to the late flowering Spencer and at least three weeks earlier. They are excellent for greenhouse as well as outside planting.

GLITTERS. Fiery orange blossoms, wing deep orange. Pkt. 10c; $\frac{1}{2}$ oz. 35c; 1 oz. 60c; $\frac{1}{4}$ lb. \$1.75.

HARMONY. Clear lavender. Pkt. 10c; $\frac{1}{2}$ oz. 40c; 1 oz. 70c; $\frac{1}{4}$ lb. \$2.00.

HERCULES. Rose-pink. Pkt. 10c; $\frac{1}{2}$ oz. 30c; 1 oz. 50c; $\frac{1}{4}$ lb. \$1.60.

SUPERIOR PINK. Rose pink. Pkt. 15c; $\frac{1}{2}$ oz. 50c; 1 oz. 85c; $\frac{1}{4}$ lb. \$3.00.

ANGELUS. Salmon pink on light cream background. Pkt. 15c; $\frac{1}{2}$ oz. 50c; 1 oz. 85c; $\frac{1}{4}$ lb. \$3.

WHITE HARMONY. A black seeded pure white. Pkt. 25c; $\frac{1}{2}$ oz. 85c; 1 oz. \$1.75; $\frac{1}{4}$ lb. \$6.

SNOWFLAKE. Pure white. Pkt. 10c; $\frac{1}{2}$ oz. 30c; 1 oz. 50c; $\frac{1}{4}$ lb. \$1.60.

ZVOLANEK'S ROSE. Rich rose pink. Pkt. 10c; $\frac{1}{2}$ oz. 35c; 1 oz. 60c; $\frac{1}{4}$ lb. \$1.75. One packet each of the above 5 varieties for 40c.

B. & H. ELY. FLOWERING MIXED. Pkt. 10c; $\frac{1}{2}$ oz. 30c; 1 oz. 50c; $\frac{1}{4}$ lb. \$1.60.

Spencer Sweet Peas.

B. & H. SPENCER or GIANT FLOWERING

B. & H. SPENCER MIXED—All of the very best varieties of the Spencer large type of Sweet Peas is contained in this wonderful mixture. Pkt. 10c; 1 oz. 20c; $\frac{1}{4}$ lb. 50c; 1 lb. \$1.50.

Separate varieties of large flowering Spencer Peas
MISS CALIFORNIA. Salmon pink. Pkt. 10c; 1 oz. 30c; $\frac{1}{4}$ lb. \$1.00.

APPLE BLOSSOM SPENCER. Bright rose, wings light flesh rose. Pkt. 10c; 1 oz. 25c; $\frac{1}{4}$ lb. 75c.

AUSTIN FREDERICK IMPROVED. Very large pure lavender. Pkt. 15c; 1 oz. 25c; $\frac{1}{4}$ lb. 75c.

COUNTESS SPENCER. Bright, clear pink. Pkt. 10c; 1 oz. 25c; $\frac{1}{4}$ lb. 75c.

CORNWELL. Deep blue. Pkt. 15c; 1 oz. 30c; $\frac{1}{4}$ lb. \$1.00.

KING EDWARD. Scarlet with a rich crimson shade. Pkt. 10c; 1 oz. 25c; $\frac{1}{4}$ lb. 75c.

KING WHITE. Pure white. Pkt. 15c; 1 oz. 25c; $\frac{1}{4}$ lb. 75c.

MARY PICKFORD. Cream pink suffused with salmon. Pkt. 10c; 1 oz. 50c.

PICTURE. Cream pink suffused apricot. Pkt. 10c; 1 oz. 25c; $\frac{1}{4}$ lb. 75c.

ROYAL PURPLE. Royal purple. Pkt. 10c; 1 oz. 25c; $\frac{1}{4}$ lb. 75c.

ROYAL SCOT. Brilliant scarlet. Pkt. 10c; 1 oz. 35c; $\frac{1}{4}$ lb. \$1.00.

Summer Flowering Bulbs

TUBEROSES

Tuberose.

DOUBLE EXCELSIOR PEARL—Suitable for culture anywhere, in pots or open ground, and is the most fragrant of the summer flowering bulbs. Our first size bulbs are sure bloomers. Each 5c; doz. 50c.

CALADIUMS, ESCULENTUM

Plant grows to good height; the large leaves often measure a yard in length and shaped much like an elephant's ear. Requires rich soil and plenty of water. Small size, each 15c. Medium size, 30c each. Extra large size, 50c each.

FANCY-LEAF CALADIUMS

An attractive foliage plant of easy culture. Will do well in the open as well as in pots in partly shaded places. Rich soil and plenty of moisture are necessary for the best growth. Makes a very showy plant for home, conservatory or window boxes. Assorted colors. Each 35c; doz. \$3.25.

B. & H. Gladioli Bulbs

No American garden could be complete without this most reasonably priced summer flower. It is undoubtedly the only flower which can be had in bloom all summer through, from July till frost, while moreover no other variety will show such an enormous variety of the most wonderful shades and colors.

Especially during the last seven or eight years the gladiolus has been greatly improved, not only in color, but more especially in size of flower, grace of stems, etc.

Below is a list of some of the old timers and some of the very latest introductions, selected by us as the very CREAM of Gladioli.

CULTURE—For best results Gladiolus should be planted in a sunny location in rows 18 inches apart and about 6 inches in the row. They require a great deal of plant food and unless your soil is very fertile you should scatter and work into the soil **B. & H. Lawn and Garden Grower** before planting, at the rate of 10 lbs. for each 100 sq. ft. This will not only produce rapid growth, but will give color and size to the blossom. See page 39 for Fertilizer.

All First Size Bulbs

AMERICA. Soft lavender pink with lighter throat, strong spike; the most popular variety. Each 6c; doz. 50c; 100, \$3.25.

ANNA EBERIUS. Deep purple with dark bordeaux center, the whole a vivid velvety color; a novelty. Each 8c; doz. 65c; 100, \$4.00.

CRIMSON GLOW. Glowing velvety crimson shaded a little deeper in the center; tall strong grower; extra large flowers, well placed on a strong stem, considered the best in its color. Each 8c; doz. 70c; 100, \$5.00.

EVELYN KIRTLAND. Very warm rose pink, deeper at the edges of petals, shading almost shell pink towards the center; brilliant scarlet blotches on the lower petals. Tall straight spike. Each 8c; doz. 70c; 100, \$5.00.

GOLDEN MEASURE. The best of all yellows, very large flowers of excellent substance; robust grower. A super-gladiolus. Each 15c; doz. \$1.25; 100, \$9.00.

HALLEY. Salmon rose with creamy yellow blotch, very early flowering. One of the older reliable kinds. Each 6c; doz. 50c; 100, \$3.50.

HERADA. Clear mauve, shaded somewhat deeper in center, large flowers, many open at a time. A sensation since its introduction a few years ago. Each 8c; doz. 65c; 100, \$4.50.

LE MARECHAL FOCH. Color flesh pink as America, but twice its size and blooming from two to three weeks earlier. Strong, stiff stems bear from 4 to 5 immensely large flowers at a time. Each 6c; doz. 50c; 100, \$3.50.

LILY WHITE. Creamy white shading to cream in the center, extra early. Each 7c; doz. 60c; 100, \$3.75.

MRS. DR. NORTON. Silvery white base tinged with pink, deepening towards the edges of the petals, creamy blotches in throat on lower petals. Tall vigorous grower, splendid cut flower. Each 10c; doz. 85c; 100, \$6.50.

MRS. FRANCIS KING. Flame red shaded salmon towards center; well known old timer. Very tall erect spike with many flowers open at a time. Each 6c; doz. 50c; 100, \$3.75.

MRS. FRANK PENDLETON. Deep rose pink shading to pale pink in throat, large, bright

Mixed Gladioli.

crimson blotches on lower petals, giving it a striking appearance. Tall, vigorous grower; extra good cut flower and forcer. Each 6c; doz. 50c; 100, \$3.75.

PANAMA. Rose pink, self color; very large wide open flowers on extra strong stiff stem; an old reliable variety. Each 6c; doz. 50c; 100, \$3.50.

PEACE. Very large, nearly white, with pale violet feathering on lower petals; flowers correctly placed on a tall, graceful spike. Each 7c; doz. 60c; 100, \$3.75.

PRINCE OF WALES. The most delicate salmon pink, very early bloomer. Many flowers open at a time. Each 8c; doz. 60c; 100, \$4.25.

ROSE ASH. Old rose overlaid and blended with pink, blue and red, giving the color of ashes of roses, hence its name. Large flowers on tall, strong spikes; very attractive. Each 10c; doz. 75c; 100, \$6.00.

SCHWABEN. Light lemon yellow with little red stripes on lower petals. Very sturdy stem bears from 5 to 6 large flowers at a time. Old favorite. Each 8c; doz. 65c; 100, \$4.50.

Dahlia Bulbs

B. & H. select list of Dahlias are composed of the very best varieties, and is the first choice of many Dahlia experts. They are chosen for color, formation, size, stem and profusion of bloom. Each bulb guaranteed true to name.

ADDA PATTERSON Hybrid Cactus (Kemp). Large pure white on long, stiff stems. A splendid dahlia in every respect. \$3.00.

AL KORAN Decorative (Davies). Goldenrod and amber. Very large. 75c.

B. & H. Seeds For Hay, Pasture and Soil Improving

You can depend upon our Clover and Grass Seed being high in purity and strong in germination. We exercise a great deal of care in purchasing these items.

ALFALFA CLOVER SEED

WESTERN GROWN. This is the original or old standard variety making heavy yields of very fine nutritious hay and usually stands for a number of years. Prices subject to change. Lb. 35c; bu. \$15.50. Cotton bag extra, 35c.

GRIMM'S, IN SEALED BAGS. A variety having a spreading or lateral root system, proven to be more hardy and lasts longer than other varieties. Present prices— $\frac{1}{2}$ bu. \$15.00; bu. \$30.00.

Sweet Clover

One bushel will seed four to five acres.

One of the greatest plants for enriching the soil.

WHITE BLOSSOM (SCARIFIED). Per bu. \$6.00.

YELLOW BLOSSOM (SCARIFIED). Per bu. \$6.50.

JAPAN CLOVER (LESPEDeza). Will grow on the poorest and dryest soils, and a splendid grass crop for restoring fertility in worn-out fields. Stock eat it readily and fatten on it. Price, lb. 35c; bu. (24 lbs.), \$6.00.

KOREAN LESPEDEZIA. A new variety that is rapidly superseding the common variety; it is more vigorous in growth, affording nearly double the amount of pasture. It is claimed that when eaten by milch cows along with wild onions, that the taste of onions are not noticeable in the milk. Seeds should be sown about April 1st, 5 lbs. to the acre is sufficient for a catch crop as it reseeds itself. 20 lbs. to the acre should be sown if a thorough covering is desired the first season. 1 lb. 60c; 10 lbs. at 50c.

GRASSES

TIMOTHY

Timothy is recognized most everywhere as a valuable hay crop; thrives well on most any soil, does much better than other grasses on low land. It can be sown either in the fall or spring months. Present prices—Lb. 25c; bu. \$3.50.

ORCHARD GRASS

Orchard Grass is a very valuable grass for pasture or hay; grows very rapidly and will furnish an excellent pasture of green grass very early in the spring and late in the fall. Present prices—Lb. 30c; bu. \$2.75; 10 bus. and over at \$2.60.

RED TOP or HERD GRASS

Will do well on most any soil that will grow other grasses. Particularly adapted to low moist land; very valuable for lands that are inclined

CLOVERS

RED CLOVER. A standard variety and used extensively in crop rotation. Being a nitrogen gathering plant, it enriches the soil as well as being a very heavy producer of excellent hay.

All prices on Clovers subject to change.

Domestic, Lb. 50c; bu. \$22.00.

Crimson Clover.

Cotton bags extra at 35c.

MAMMOTH, or SAPLING CLOVER. The plant of this clover is at least one-third larger than the ordinary Red Clover. Price—Lb. 50c; bu. \$23.50.

ALSIKE CLOVER. One of the hardiest of all clovers. Present prices — Lb. 50c; bushel \$22.00.

CRIMSON CLOVER. An annual clover usually sown in this latitude during months of July, August or September. Prices on application.

Red Clover.

to wash; makes excellent pasture and very fine hay. Present price—Lb. 40c; 5 lbs. at 25c; 100 lbs. at 20c.

DWARF ESSEX RAPE

Unequaled as a green forage or grazing for sheep, hogs or poultry. Can be planted in rows or broadcasted 6 to 8 lbs. per acre and will be ready for grazing in about 6 to 8 weeks. Price: Lb. 20c; 10 lbs. \$1.25; 100 lbs. \$10.00.

HAIRY VETCH

Great Hay and Fertilizing Plant

A very hardy nitrogen-gathering plant that is used extensively as a winter cover crop. Lb. 20c; 10 lbs. \$1.80; 100 lbs. \$17.00. Prices subject to change.

SEED CORN—FIELD VARIETIES

HAND PICKED AND CAREFULLY SELECTED

Germination Test Guaranteed Satisfactory

BOONE COUNTY WHITE. Possibly has the largest and longest ear and deepest grain of any corn grown. The grains are soft and pure white, the cob large and white and is usually well filled over the tip end. Lb. 30c; pk. 90c; bu. \$2.75.

TENNESSEE RED COB WHITE DENT. This variety compares in size and habit of growth very favorably to the Boone County, differing in having a red cob. Lb. 30c; pk. 90c; bu. \$2.75.

HICKORY KING. The cobs are very small, the grain white and are so broad that it only takes 8 rows to fill the cob. Lb. 30c; pk. \$1.00; bu. \$2.50.

REID'S YELLOW DENT. A heavy yielding, dependable corn. The ears average about 10 inches long and well filled with 18 to 20 rows of deep kernels. Lb. 30c; pk. 90c; bu. \$2.75.

SORGHUM, or CANE SEED

For Forage and Syrup.

RED TOP. Most popular for feed and is a very good syrup variety. Price—Lb. 20c; 10 lbs. 60c; bu. \$2.00.

ORANGE. A splendid variety that grows well and produces a light colored and fine flavored syrup. Lb. 20c; 10 lbs. 60c; bu. \$2.00.

AMBER. An early variety grown extensively for forage. Lb. 20c; 10 lbs. 60c; bu. \$2.00.

TEXAS SEEDED RIBBON. Being closely related to sugar cane. It is without doubt the very best for syrup. It matures in about 120 days and is a very heavy yielder of sweet juice that will make into a deliciously flavored molasses. Present price—10 lbs. 85c; bu. \$3.25.

MILLET

A Splendid Annual Hay Crop

TENNESSEE GOLDEN (GERMAN). A very rapid-growing plant and on good soil grows 4 to 5 feet high, producing a very sweet and palatable hay. Prices fluctuate and are subject to change. Bu. \$3.00; 10 bus. and over, at \$2.85.

Inoculate

Alfalfa, Sweet Clover, All Clovers, Soy Beans, Cow Peas, Vetch, Peas, Beans—All Legumes with

Soy Beans

Recognized as the Standard Annual Hay Crop and Soil Enricher

PRICES QUOTED ON APPLICATION

MAMMOTH YELLOW. Largest and heaviest hay producer of all of the Soy Beans. Bu. \$3.00.

WILSON EARLY BLACK. An early variety, maturing in about 115 days. Highly recommended for hay. Bu. \$3.50.

EARLY HOLLYBROOK. A heavy yielder of both Hay and Beans of high quality. Grows about 3 feet high. Bu. \$3.00.

VIRGINIA BROWN. A splendid variety for hay. Bu. \$3.40.

Cow Peas

CROP VERY SHORT

PLEASE WRITE FOR QUOTATION WHEN READY TO BUY.

POP CORN

WHITE RICE. The good old popping variety, ears long and good size, grain white and sharp pointed. Pkt. 10c; lb. 30c.

JAPANESE HULLESS. The ears are short and thick, while the kernels are small, white, much the shape of White Rice. They pop readily, are very tender and of the finest quality. Pkt. 10c; lb. 35c.

SILAGE CORN

EUREKA ENSILAGE. This is a tall and leafy variety growing 12 to 15 feet high with an enormous growth of fodder. It bears 1 to 2 ears to the stalk, the ears frequently over 12 inches. Lb. 30c; pk. 85c; bu. \$3.00.

SOUTHERN PROLIFIC. Stalks are large, 8 to 12 feet tall; leaves are large and plentiful, the ears medium size and often 4 to 6 on a stalk. Lb. 30c; pk. 85c; bu. \$3.00.

OATS

Prices Subject to Market Change

NORTHERN WHITE. At present the most popular variety, grows well on most soils. Our stock is recleaned and put up in even weight 5-bu. bags. Bu. 85c; 5 bus. at 80c.

EARLY BURT. This is a white oat with a brownish tinge and matures a week or 10 days earlier than Northern White. Bu. \$1.10; 5 bus. at \$1.00.

SUDAN GRASS

A Heavy Producing Annual Hay Crop

Will grow and do well on most any kind of soil, however grows faster and taller on bottom lands where it can get sufficient moisture. Can be cut three to four times a season, producing from 1 to 2 tons of Hay each cutting. Is very popular with dairymen as a milk-producing green feed during the hot dry summer months. Broadcast 15 lbs. to the acre. Present price—Lb. 25c; 10 lbs. 85c; 100 lbs. \$6.50.

Seed Disinfectants

CONTROL SEED-BORNE DISEASES OF FARM CROPS

Stimulate Germination — Improve Stands

Generally Produce Increased Yields of Higher Quality

SEMESAN BEL

For Seed White and Sweet Potatoes

Prices:

4 ozs. \$.50
1 lb.	1.75
5 lbs.	8.00
25 lbs.	31.25
100 lbs.	120.00
300 lbs.	345.00

Simply mix, dip, drain, dry and your seed potatoes are ready for planting. Semesan Bel effectively controls such seed-borne disease organisms as scab, rhizoctonia and black-leg. By controlling these diseases, germination is generally increased, stand improved and the resultant crop bigger and of better quality. One pound treats 16 to 20 bushels of seed. Du Bay Semesan succeeds the products sold as Du Pont Semesan Bel and Bayer Dipdust.

SEMESAN JR.

For Seed Field and Sweet Corn

Semesan Jr. is especially effective in controlling seed-borne infections of diplodia, Gibberella and Basiporium, without harming the seed embryo in the least. Its use protects the seed from rotting in the ground and makes possible earlier planting which generally results in increased yields. Improved germination, better stands, control of certain diseases, increased yields are the benefits which thousands of farmers are reaping, at a cost of less than 3c an acre. Succeeds the products sold as Du Pont Semesan Jr. and Bayer Dust.

Prices:

4 ozs. \$.50
1 lb.	1.75
5 lbs.	8.00
25 lbs.	31.25
100 lbs.	120.00
300 lbs.	345.00

SEMESAN

For Flower and Vegetable Seeds

Semesan may be applied in dust or liquid form to the seed before planting. It is harmless to the seed but deadly to disease organisms that may be on the seed. Semesan is such a powerful and effective disinfectant that seed treatment with it is ridiculously low in cost, ranging from $\frac{1}{4}$ c to 1c per pound of seed. One ounce treats 15 lbs. of seed. Effective in controlling damping off and such devastating gladiolus diseases as hard rot and scab. Du Bay Semesan succeeds the products sold as Du Pont Semesan and Bayer Uspulun.

Prices:

2 ozs. \$.50
1 lb.	2.75
5 lbs.	13.00
25 lbs.	56.25
100 lbs.	220.00
300 lbs.	645.00

CERESAN

For Seed Treatment of Small Grains

Ceresan has proven effective in controlling such seed-borne diseases as bunt or stinking smut of wheat; stripe disease of barley; loose and covered smuts of barley and oats and covered kernel smut of sorghum. It is the only dust treatment which has successfully controlled these destructive grain diseases. Ceresan does not injure the seed nor the grain drill. Only 2 oz. of Ceresan required per bushel of wheat, rye or sorghum and 3 oz. for barley and oats. Easy to apply, economical to use.

Prices:

8 ozs. \$.50
1 lb.	.75
5 lbs.	3.00
25 lbs.	12.50
100 lbs.	49.00
300 lbs.	144.00

Select Seed Potatoes

Due to the unusually early frost of September 23rd, locally grown second crop seed potatoes are very small and scarce, therefore varieties listed here are Northern grown and of exceptionally good quality. On request we will be pleased to quote prices on limited quantities of Kentucky grown second crop.

EARLY VARIETIES FOR SPRING

Prices Subject to Change

SELECT IRISH COBBLER. The best variety of all for this vicinity. A good yielder of excellent quality. This potato is the only one planted here in the spring for the shipping trade, being a sure yielder. Our supply of Cobblers is from high yielding stock. Large size: Pk. 90c; bu. \$2.75; 150-lb. bag \$5.00. Number twos medium size: Bu. \$1.75; 150-lb. bag \$4.00. Certified 150-lb. bag. \$6.25.

BURBANK (NORTHERN). This is a late variety and largely used for the main crop in some family gardens. This is a long white potato and very dry and mealy when cooked. Pk. 90c; bu. \$2.50; 150-lb. bag \$6.00.

EARLY OHIO (NORTHERN). An early variety, used by some market gardeners for the early market. This is a white potato with few

eyes and a fair yielder. Pk. 90c; bu. \$2.50; 150-lb. bag. \$6.00.

EARLY ROSE (NORTHERN). An old variety which is still largely planted in some localities. Potatoes are oblong in shape and good eating quality. Pk. 75c; bu. \$2.25; 150-lb. bag \$5.50.

EARLY TRIUMPH. The earliest varieties of all. Potatoes are round with pink skin and shallow eyes, good quality and a fair yielder. Pk. \$1.00; bu. \$2.75; 150-lb. bag \$6.50.

No. 2 Planet Jr. Edger
Weight 3 1/4 lbs.

Everyone who uses a lawn mower, has work for one of these edgers; adjustable for a tall or short person. Indispensable in keeping grounds looking neat and attractive, the No. 2 Edger will quickly edge the grass bordering all walks, straight or curved, cement, stone or brick. It is easily operated. Price \$1.60.

English Scythe Blades

Will hold a fine cutting edge, cutting blade made of high grade tool steel with riveted back. Price, 30-32 or 34-inch, each, \$2.65.

English Grass Hooks

Tool steel with riveted back. Price, each, 85c.

Whirling Showers Lawn Sprinkler

Now you can buy a completely adjustable lawn sprinkler at a reasonable price. Whirling Showers gives every type of spray from fine mist to heavy shower. Sprinkles strip or circle and will cover diameter of 70 feet. A leak proof all metal joint eliminates soft packing and its attendant trouble. Sprinkler will operate for years without attention as it is made entirely of brass excepting base, which is malleable iron. Leak proof, drip proof and practical in every respect. Price, \$2.75.

Water Hose

Crack Proof hose has two layers of double twisted, high grade cotton, woven into a seamless tube, impregnated and completely covered inside and out with tough live rubber. It will stand high pressure and rough usage. 3/4 inch, 12 1/2 c per ft; 1 inch, 14 c per ft. Brass Couplings, 25c per set.

Lawn Mowers

Genuine Philadelphia Lawn Mower

The Philadelphia Series "S" Mower Style S-A is the highest grade lawn mower ever built. It is constructed principally of pressed steel, making it practically unbreakable. Equipped with radial ball bearings in the wheels, as well as journals of revolving cutter; gears enclosed in oil-tight dust-proof cases. Ratchets are noiseless, and start the revolving cutter instantly. Five blades on cutting reel—wheels 10 inches high. 15 inch, \$30.00; 18 inch, \$36.00.

Style S-C. A new pressed steel Philadelphia Mower—built for the class of trade requiring a mower for the ordinary size lawn. It is 95 per cent unbreakable, light and easy running. Four blades on cutting reel. Wheels 9 inches high. 15 inch, \$21.00; 18 inch, \$24.50.

Philadelphia Lawn Trimmer is made of high grade material and designed to mow close to trees, fences and around flower beds and edges. Each \$10.50.

PROTECT PLANTS FOR PROFIT

GERMACO HOTKAPS can make you extra dollars this season. They protect plants from frost, wind, rain, insects and ground crusting. Thus they produce hardier, **quicker** crops. You get higher prices! Thousands were used in 48 states last year. They cost so little that growers cannot afford to be without them.

Prices: 1,000 lots, \$11.50; 5,000 lots, \$11; 10,000 lots, \$10.75. 250 trial package, including garden type waterproof setter, \$4.00; Germaco steel **HOTKAP** setter, \$2.50.

If you need **HOTKAPS** for your backyard garden, note these prices: 50 with garden setter, \$1.50; 100 with garden setter, \$2.25; garden setter alone, 50c.

BROADCAST SEEDERS

THOMPSON'S WHEELBARROW GRASS SEEDER

THE "HORN" SEED SOWER—The Sectional Tube Style Has Brass Seed Gauge—It is used for sowing clover, timothy, alfalfa and all other small, smooth seeds. Is adjustable to sow any amount. **Each, 90c.**

No. 6—Single Hopper Seeder sows all small seeds like clover, timothy and alfalfa, with Hopper 14 ft. long. **Each \$11.00.**

No. 5—Double Hopper Seeder sows all small seeds like clover, timothy and alfalfa, and also chaffy seeds like Red Top, Orchard Grass and Clean Blue Grass, with Hopper 14 feet long. **\$13.00.**

THE CYCLONE SEED SOWER—Its well known double feed insures a uniform flow of seed. The slope feed board keeps hopper properly filled. Feed adjustment is automatic and starts or stops flow of seed instantly. **Price, each, \$2.00.**

Dry Powder Dusters for Insecticides

FEENEY MODEL A DUSTER. Illustrated above, is especially constructed for dusting vine crops and low spreading plants. The nozzle arrangement also adapts it for applying dust on underneath side of bean leaves. **Each \$2.25.**

FEENEY MODEL BX DUSTER. Reservoir holds about 1 pint, is equipped with long tube and spreader nozzle, adapting it for dusting underneath the leaves of low plants. **Price, each \$1.00.**

Feeney Model D Duster.

TIME-SAVER PLANT SUPPORT

Your flower and vegetable gardens' best friend. Made in different sizes and lengths. Placed and adjusted to height and to any size of loop almost instantly. For Shrubbery, Tomatoes, Dahlias, Peonies, etc.

They are made of cold drawn galvanized steel, pointed and looped. Each stake is complete with one galvanized sliding clip and loop. These stakes should be driven in ground 15 to 18 inches.

Prices:	Per Doz.
No. 2—3 ft.	\$1.00
No. 3—3½ ft.	1.45
No. 3A—4 ft.	2.20
No. 4—5 ft.	2.55

ADJUSTO PLANT SUPPORT

Consist of a hardwood stake ¾ inch square and pointed at bottom end, with an instantly adjustable patented loop of 7-gauge strong spring wire for supporter, both painted green, which harmonizes with the growing plants.

Prices:	Per Doz.	Time Saver Plant Support
4 ft. Complete	\$3.00	
5 ft. Complete	3.60	
6 ft. Complete	4.20	

Adjusto Plant Support

STAKES ONLY

Garden Stake—12x1½ inch. 100 for \$1.50; 1000 for \$14.00.

GATOR HIDE MULCH PAPER

An economical help in producing larger and earlier yields of vegetables and fruits. It retains moisture in the soil, prevents growth of weeds and grass. Keeps vine crops off the ground. Saves cultivation. A complete booklet on Gator Hide mulch paper mailed free on request. Type A for annual crops, 300 yards to roll 18 inch wide, \$3.50; 36 inch wide, \$7.00. Type B for Perennials, 150 yds. to roll 18 inches wide, \$3.50; 36 inches wide, \$7.00.

FEENEY MODEL B DUSTER. Is just the right size for home gardens. **Each 85c.**

FEENEY MODEL D DUSTER. Holds two quarts, and is the right size for small truck gardens and tobacco growers and anywhere a medium capacity one-row duster can be used successfully. **Each \$3.75.**

LEGGETTS IMPROVED CHAMPION DUSTERS. A well made machine for blowing all kinds of dry insecticides on plants and trees. Will dust two rows at a time as fast as operator walks. Long tubes carry the poison away from the operator. **Price, each, \$14.00.**

LEGGETTS FOUR-ROW BEETLE DUSTER. This machine will dust four rows at one time. One horse draws it with ease; it is well made and will last a long time if properly cared for. **Price, \$135.00.**

Sprayers

AUTO SPRAY No. 22-A. Is a strong hand atomizer made of heavy tin. It is of one quart capacity and throws a fine misty spray. Price 50c.

AUTO SPRAY No. 26. Is so designed that the pressure generates on the down stroke of the plunger allowing this sprayer to produce a continuous mist-like spray.

No. 26-A. One quart; all tin. Each, 85c.

No. 26-C. One quart; all brass. Each, \$1.30.

PARAGON SPRAYERS

No. 3
Paragon

An improved type of pump for whitewashing and spraying, very rugged in construction and designed for ease of operation. The air chambers are of sufficient size to insure a constant spray at high pressure. Strainer is made of brass and automatically cleaned at each stroke of the pump by the bell-metal agitator. All working parts are easily removed for cleaning or repairing.

PARAGON SPRAYER No. 0. Is equipped with 4 feet special spray hose, 3 ft. spray pipe, 1 Mist Spray Nozzle, 1 Steel Cap for whitewashing, 1 Straight Spray. Price, \$12.50.

PARAGON SPRAYER No. 1. Equipped with 5 ft. Special Spray Hose, 5 ft. pipe, 1 Mist Nozzle, 1 Steel Cap for whitewashing, 1 Straight Spray Nozzle. Price, \$17.50.

PARAGON SPRAYER No. 3. Equipped with 10 ft. Special Spray Hose, 7½ ft. of Extension Pipe, 1 Mist Nozzle, 1 Steel Cap, 1 Straight Spray. Price, \$25.00.

No. 0
Paragon.

MYERS SPRAY PUMPS

MYERS IMPROVED BRASS BARREL SPRAY PUMP, No. R318B. The construction is such that the entire pump sets inside the barrel containing the liquid, being bolted fast at its upper end to the head of the barrel. Size of hole to cut in barrel 8x8 ins. Price complete as illustration (15-inch hose), \$14.00.

No. R324

MYERS COG GEAR BRASS BUCKET SPRAY PUMP No. R324.

Myers Bucket Spray Pump with cog gear handle. This pump has 1½ inch diameter brass cylinder with solid plunger, brass ball valves, brass air chamber and discharge tube. The foot rest, head and cog gear handle make this an exceptionally easy-working pump of more than ordinary capacity. Has patented jet agitator which keeps liquids thoroughly mixed. Equipped as illustrated, each \$6.00.

MYERS COG GEAR BARREL SPRAY PUMP No. R305B. For use in open end barrels. Cylinder, valves, valve seats and discharge pipe all brass. All working parts submerged in liquid, hence no priming necessary. Have both Jet and Mechanical Agitators. Cylinder 2 inches in diameter. Price with one lead of 15 ft. of ½ inch 5-ply discharge hose graduating vermored nozzle, \$18.00.

No. R318B

PAT JET AGITATOR

MYERS HANDY PORTABLE SPRAYER No. R336B.

The pump used in this outfit has a much larger capacity than ordinary pumps of this class. Cylinder is 2 inches in diameter. Patented Cog Gear Handle makes operation as easy as other pumps of much smaller capacity. The dasher agitator operates with every stroke of handle. The tank holds 12½ gallons and is made of heavy galvanized iron. The outfit is suitable for greenhouse work, spraying trees, whitewashing, painting, washing autos, etc. Price, \$23.00.

No. R336B

BROWN'S AUTO SPRAY No. 9. Strong, simple, compressed air sprayer. Balanced construction; guaranteed against mechanical defects. Equipped with a clog proof nozzle. Either Brass or Galvanized tank as ordered. We strongly recommend the brass tank because it will not corrode with strong solutions and will last indefinitely.

For spraying field crops, shrubs, vines, poultry houses, for removing wall paper, disinfecting, whitewashing, creosoting shingles, applying floor oils and for general purposes.

Specifications—Diameter 7 inches, height 2 feet, capacity 4 gallons, equipped complete for spraying with 2 feet of ½ inch 5-ply hose.

Auto-Spray No. 9-D. Galvanized tank with Auto-Pop and 2 feet brass extension, \$6.75.

Auto Spray No. 9-B. Brass tank with Auto-Pop and 2 feet brass extension, \$9.75.

BROWN'S AUTO SPRAY No. 50. Has same general design as No. 9, only smaller. Tank holding 2½ gallons. It is the Ideal compressed air sprayer where spraying is not extensive.

Galvanized Tank, auto pop and 15 inch brass extension, \$8.35.

Brass Tank, auto pop and 15 inch brass extension, \$5.90.

BROWN'S AUTO SPRAY No. 26-AG. A continuous atomizer with glass tank. It is easily cleaned and does not rust out. The operator can always tell how much liquid is in the sprayer. Having standard mason fruit jar threads, tank can easily be replaced if broken. Price, each \$1.25.

BROWN'S NEW ERA No. 23-C. Continuous 3 quart sprayer; handles all garden insecticides and disinfectants; also very popular for applying cattle spray.

All Brass No. 23-C, \$3.00.

ACME INSECTICIDES FUNGICIDES

Poisons Cannot Be Sent by Mail

ACME PARIS GREEN

A rich, emerald color and of fine fluffy physical character. Containing 55% arsenious oxide, it will give quickest control where extreme measures are necessary.

For use on: Potatoes, cotton, tobacco, also to mix with arsenate of lead for fruit tree spraying where quick results are necessary.

Prices: $\frac{1}{4}$ lb. 15c; 1 lb. 40c; 5 lbs. \$1.75; 14 lbs. \$4.20; 100 lbs. \$27.50.

ACME ARSENATE OF LEAD

The most favored arsenical insecticide found on the American market. It is safest to use on tender foliage and sticks well on the leaves. Recommended for fruit trees, vegetables, bushes and tobacco. Can be used as dust or spray. Prices: $\frac{1}{2}$ lb. 25c; 1 lb. 40c; 4 lbs. \$1.10; 24 lbs. \$5.25.

ACME GARDEN GUARD

A garden insecticide and fungicide for use as a dust. No water, no mixture, no muss.

For use on: Cabbage, cauliflower, tomato plants, melon vines, currants and gooseberries and other vegetables, flowers and shrubs of many kinds. Prices: 1 lb. sifter carton, 20c; 5 lbs. 75c.

ACME TWO-WAY SPRAY

A balanced insecticide and fungicide containing 14% arsenate of lead and 83% Bordeaux Mixture. Two results with one application.

Use wet or dry on: Apple, sour cherry, currant and gooseberry, grape, pear, plum, strawberry, pecan, bean, beet, cucumber, pepper, potato, tomato and many other fruits and vegetables. Prices: $\frac{1}{2}$ lb. 25c; 1 lb. 40c; 4 lbs. \$1.15; 100 lbs. \$22.00.

ACME ALL AROUND SPRAY

Flowers, vines, shrubs, roses, vegetables, need protection same as commercial crops. All Round Spray contains the three leading remedies used by all large growers, Arsenate of Lead, Nicotine Sulphate and Bordeaux Mixture.

Perfect protection for the small user is assured by complete directions in form of spraying guide attached to every package.

Prices: $\frac{1}{4}$ lb. 30c; 1 lb. 85c.

ACME BEAN BEETLE DUST

A special beetle preparation most effectively used against Mexican bean beetle. Being both stomach and contact poison, it is sure to give quick results.

To be applied only as a dust. For use against: Mexican bean beetle, potato bug, cucumber beetle and many other less common hard shelled beetles. Prices: 1 lb. 25c; 4 lbs. 55c; 100 lbs. \$11.00.

ACME CALCIUM ARSENATE

The cheapest arsenical insecticide on the market but of great economy and efficiency for certain purposes.

The accepted dust for boll weevil poisoning on cotton; also recommended to combat chewing insects on potatoes, vegetables, cotton and certain fruit trees. Prices: 1 lb. 30c; 4 lbs. 65c; 100 lbs. \$14.00.

ACME BORDEAUX MIXTURE

Prevents large losses caused by blight, rot, mildew, scab, anthracnose and certain other fungous diseases. It stimulates plant growth and greatly increases the harvests. Almost every kind of vegetable, fruit and shrub can be greatly improved by the early use of Bordeaux Mixture. 1 lb. 30c; 4 lbs. 75c; 24 lbs. \$4.25.

ACME LIME SULPHUR

A standard 33° Baume lime and sulphur converted into a dry powder but having all the effectiveness of the liquid product when dissolved in water.

For use in dormant spraying against scale, peach blight, leaf curl and twig borer. Summer spraying against scab, soot, blotch, red spider and mite.

Prices: 1 lb. 35c; 5 lbs. \$1.25; 10 lbs. \$2.00; 25 lbs. \$4.00; 50 lbs. \$7.00; 100 lbs. \$13.00.

ACME SPRAY SOAP

A (fish oil) soap effective in destroying many sucking insects and lice on plants, trees, ferns, etc. Also used extensively with cylinder oils in making oil emulsions to reduce the surface tension. Its use with Nicotine greatly increases the value of that spray. Prices: 1 lb. 25c; 5 lbs. \$1.15; 30 lbs. \$6.30.

LIQUID LIME SULPHUR

Some fruit growers prefer the Lime Sulphur Liquid, claiming it is more economical than the dry.

Prices: Qt. 35c; 2 qts. 45c; 4 qts. 65c; 30 gal. bbl. \$9.50; 50 gal. bbl. \$12.50. A credit of \$2.00 allowed for return of barrel.

FLOUR OF SULPHUR

Now being used and recommended for treating Seed Potatoes for scab; is usually dusted on while cutting potatoes for planting; also used for mildew on roses, lettuce and other plants. Prices: 1 lb. 10c; 10 lbs. 75c; 100 lbs. \$3.50. Postage extra.

TOBACCO DUST

Very effective for destroying plant lice or aphids, striped bugs on melons, cucumbers and squashes and other insects; also remedy for poultry lice. 1 lb. 10c; 10 lbs. 50c; 25 lbs. \$1.25; 100 lbs. \$4.00. Postage extra.

SLUG SHOT (Powder)

A very popular Insecticide for destroying Cabbage Worms, Tomato Worms and other leaf-eating Insects that prey on vegetables. It can be applied freely as it will not burn and is non-poisonous to human life.

Prices: 1 lb. (canister) 20c; 5 lb. pkg. 60c. (Mailable.) Postage extra.

CYNOGAS "G" FUMIGANT. An economical and valuable greenhouse fumigant for the destruction of aphids, white fly, soft scale, thrips, etc. Easily applied. Full directions on each package. 5 lb. pkg. \$2.50; 25 lb. pkg. \$8.50. Non-mailable.

Aphistrogen

This Hortogen spray destroys all traces of these pests in two or three applications, for roses, chrysanthemums, golden glow and all others subject to plant lice. Fertilizes through the leaf. Will not discolor the foliage. **A Complete spray.** Also helps to control black spot when used alternately with Fungtrogen. 2 ozs. 50c; ½ lb. \$1.25; 2 lbs. \$3.50.

Fungtrogen

This highly concentrated fungicide conquers Mildew on roses and other plants practically over night and controls Black Spot. A new and improved form of the famous Rosenbluth formula, combined with a nitrogenous element that fertilizes through the foliage. It also stimulates hollyhocks and geraniums; prevents rot and eliminates rust on carnations and the diseases of Delphiniums. ½ pt. 75c; 1 pt. \$1.25; 1 qt. \$2.00; ½ gal. \$3.50; gal. \$6.00.

Insectrogen

A remarkably effective insecticide that rids your roses and plants of leaf-chewing insects, including caterpillars, slug worms, Japanese beetles, etc., and many blights. Also fertilizes the plant through the foliage. Use alternately as a companion spray with Fungtrogen. Both carry their own spreader. Only water is required. ½ pt. \$1.00; 1 pt. \$1.75; 1 qt. \$2.75; ½ gal. \$4.50; gallon \$8.00.

M.G.K. EVER GREEN, Non-Poisonous Insecticide. A sure killer of most plant insects. Ever Green offers no poison danger whatsoever to human beings, live stock, or birds. The active principle of Ever Green is Pyrethrum, or insect flowers. 1 oz. 35c; 6 ozs. \$1.00; 16 ozs. \$2.00; 32 ozs. \$3.50; gallon, \$13.00.

SCALECIDE—The Complete Dormant Spray. The quality miscible oil. Oldest and best known dormant spray for trees, shrubs and vines—makes them more beautiful, healthful and fruitful. Used by leading fruit growers. Pleasant to use—non-caustic, non-corrosive, non-poisonous. Kills scale, insects, eggs, larvae and disease cankers and fungous spores wintering on the plant. Mixes instantly—dilute 1 to 15. Qt. 75c; gal. \$1.75; 5 gals. \$6.25; 10 gals. \$10.60; 15 gals. \$13.50; 30 gals. \$26; 50 gals. \$38. One gallon equals 3½ gallons lime-sulfur.

SULFOCIDE—A Better Summer Spray. A concentrated liquid sulfur fungicide. Used on both peaches and apples and on all kinds of fruits, vegetables, and flowers. Controls apple scab, brown rot of peaches, plums and cherries, blight and rot of potatoes, tomatoes and melons, mildew and rust of flowers and shrubs. Convenient, economical, effective. Dilute 1 to 200. Pt. 70c; qt. \$1; gal. \$2.75; 5 gals. \$8.75; 10 gals. \$15; 30 gals. \$39; 50 gals. \$60.

FLIT—A liquid preparation that actually kills flies, mosquitoes, roaches, bedbugs, moths. Also a cleaner and polish for furniture, hardwood floors and glass. Will not stain clothing and has a pleasing odor. ½ pt. can 50c; pt. 75c; qt. \$1.25; gal. \$4.00.

SANTOCHLOR—Kills the Peach Tree Borer. One ounce required for each tree. Full directions for use on each package. 1 lb. 50c; 5 lbs. \$2.00; 10 lbs. \$3.50.

COW-EASE—A very valuable material for spraying milch cows and other animals to keep off flies and other insects. It saves its cost many times during summer months when most of their time during the day is taken fighting flies when they should be grazing. Consequently it will increase milk production. 1 qt. 40c; ½ gal. 75c; 1 gal. \$1.25; 5 gal. \$5.00.

CYANOGLAS—"A" Dust. Forms a gas that will when properly applied destroy ants, rats, ground-hogs, etc. 1 lb. pkg. 60c; 5 lb. pkg. \$2.50. Non-mailable.

B. & H. Fertilizers

For Farm, Garden and Lawn

WHAT PLANT FOODS DO

The three elements of plant food that our soil is most deficient in are: Nitrogen (Ammonia), Phosphate and Potash. These combined are known as commercial fertilizer.

AMMONIA promotes stem and leaf growth, increases the stooling of grasses and small grains, favors root development, and produces new wood on apple, peach, and other fruit trees. In general, it gives to the foliage the healthful green color characteristic of vigorous growth.

PHOSPHORIC ACID produces vigorous root growth early in the season—a most important function, and also promotes early ripening. When crops are slow to mature and take weeks when they should take days, it indicates a most serious lack of this all-important plant food.

POTASH favors starch formation and aids in making heavy grains. It also stiffens the stems of grasses and grains and thus helps prevent lodging. Crops which have sufficient potash have a greater disease resistance.

B. & H. HIGH GRADE VEGETABLE

Guaranteed Available Analysis
Nitrogen, 4%; Phosphate, 10%.

This is prepared especially for market growers who require a quick acting fertilizer to assist in bringing their crops to early maturity. It is especially recommended for garden peas, early corn, onions, lettuce, beans, and other such early maturing crops. 125-lb. bag, \$3.00; ton, \$40.00.

B. & H. TRUCKERS SPECIAL

Guaranteed Available Analysis; Nitrogen, 2%; Phosphate, 10%; Potash, 4%.

This is a complete fertilizer for vegetables, vine crops, tomatoes and corn and other crops that require a liberal amount of potash. 125-lb. bag, \$2.60; Ton, \$35.50.

B. & H. SPECIAL GRAIN GROWER

Guaranteed Available Analysis

Nitrogen, 2%; Phosphate, 12%; Potash, 2%.

This brand will meet the requirements of those who desire a high grade wheat and other small grain fertilizer. A good many farmers are now buying this brand instead of pure Bone Fertilizer. 125-lb. bag, \$2.75; ton, \$39.00.

B. & H. CHAMPION POTATO GROWER

Analysis; Nitrogen, 4%; Phosphate, 10%; Potash, 4%.

As sales on our B. & H. Champion Potato Grower are increasing each year, we are positive that it is giving better returns, and that it pays to buy high grade fertilizer for potatoes. 125-lb. bag, \$3.00; ton, \$41.00.

B. & H. A-1 POTATO GROWER

Guaranteed Available Analysis

Nitrogen, 3%; Phosphate, 8%; Potash from Sulphate, 6%.

We have combined in our B. & H. A-1 Potato Grower plant food from elements that not only give the plant a quick start but will last, helping to develop the crop through to maturity. It is also a splendid fertilizer for all other root crops. Tomatoes and tobacco. 125-lb. bags \$2.90; ton, \$39.50.

BONE MEAL

Guaranteed Available Analysis; Nitrogen, 1 1/4%; Bone Phosphate, 30%.

Pure animal bone, finely ground, gives splendid results on grass and small grain crops, Berries, Shrubs, Trees, Perennials, etc. 100-lb. bag, \$3.00; ton, \$44.00.

RAW BONE

Nitrogen, 4%; Phosphate, 22%.

Packed in 100 lb. bags, an excellent Fertilizer for Trees, Shrubs, Strawberries, as the plant becomes available over a longer period of time than mineral plant foods. 5 lbs. 35c; 10 lbs. 60c; 25 lbs. \$1.25; 50 lbs. \$2.00; 100 lbs. \$3.50.

NITRATE OF SODA

Used for forcing vegetable and other plants where quick growth is desired. 1 lb. 15c; 5 lbs. 50c; 100 lbs. \$5.00.

ACID PHOSPHATE 16%

Acid Phosphate is used quite extensively on small grain crops. Cow Peas, Soy Beans, etc. When mixed with stable manure it makes a very complete fertilizer. 125-lb. bag, \$1.85; ton, \$22.75.

Planet Jr. Garden Tools

No. 3 Hill and Drill Seeder

The No. 3 is the market gardener's and trucker's favorite. Sows practically all vegetable seeds in straight drills; or drops in hills 4, 6, 8, 12 or 24 inches apart. Opens the furrow, drops the seed at the right depth and thickness, covers and firms the soil, and marks out the next row. Capacity 3 quarts. Index accurate and easily set; handles adjustable to suit height of operator. Price, \$17.50.

The No. 4 is especially designed for the home gardener and for the small market gardener. More of them in use than any other tool of this kind. Sows in straight drills or drops in hills 4, 6, 8, 12 or 24 inches apart. Capacity of hopper 2½ quarts. A complete seeding and cultivating machine, useful from beginning to end of the gardening season. Price, \$18.00.

No. 4 Hill and Drill Seeder and Single Wheel Hoe Combined

No. 4-D Hill and Drill Seeder only. Price, \$14.25.

No. 26 Drill Seeder

Its broad wheels front and back make it easy to push. It does not sink in soft ground. The new feed wheel principle forces the seed through the opening evenly without breaking any seed. Capacity 4 qts. Special opening plow cuts a sharp drill; and the wings on opening plow prevents soil from falling back and prevents seeds blowing away. The marker leaves a clean cut line.

Scrapers on front and back wheels. Hopper removable to empty seed. The No. 26 is a drill seeder that will save a lot of time. Price, \$20.00.

No. 220 Fertilizer Distributor

The No. 220, although new just last season, has become a favorite wherever it has been used. It is designed to place the fertilizer just where it is wanted and in the right quantity. Sows over a width of from 4 to 30 inches, one hundred to two thousand pounds of commercial fertilizer to the acre. Used in rows as close as 9 inches. Capacity of hopper one bushel. Load placed over wheel which makes it push easy. Spouts easily adjusted; positive, even distribution at every step. No canvas belts, gears or chains to break, rust, tear or stick. Price, \$27.00.

No. 101-D Plain Cultivator (Horse)

Lever expander. Opens to 26 inches; closes to 15 inches. The No. 101 is especially adapted for light soils, and it is easily handled. Planet Jr. quality in every respect and will give many years of satisfactory service. Price, \$9.25.

No. 12 Double and Single Wheel Hoe

A very popular and complete garden tool. Equipment: as illustrated. As a double wheel hoe it cultivates both sides of the row by straddling until plants are 20 ins. high. It is then useful as a single wheel hoe between rows. Cultivating equipment all oil-tempered; will last for many years. Price, \$10.75.

No. 13 Double and Single Wheel Hoe

Equipment one pair of 6-inch hoes only. Price, \$8.00.

No. 17 Single Wheel Hoe

The No. 17 is very popular with both the home gardener and the market gardener. It includes just the equipment that is most generally used and with which you can plow, cultivate, weed, hoe, open furrows for large seed, fertilizer, etc., and cover them, and hill up plants. Handles adjustable to suit height of operator. Price, \$7.75.

No. 17½—Same as No. 17. less the plow. Price, \$6.75.

No. 18—Equipment one pair of 6-inch hoes only. most useful cultivating attachment. Price, \$5.75.

The No. 19 is a very complete and at the same time moderate priced garden plow and cultivator. The equipment includes a 2-inch cultivator tooth a 10-inch sweep, large garden plow, and a 5-tooth cultivating attachment.

With the No. 19 you can plow, cultivate, hoe, rake, weed, open and close furrows and hill up plants. Price, \$6.00.

No. 119 Garden Plow and Cultivator

If you buy a high wheel garden plow and cultivator—be sure it is a Planet Jr. The No. 119 is Planet Jr. quality throughout and will give a "Planet Jr. lifetime" of service.

Equipment as illustrated. Depth of cultivation can be regulated; handles adjustable to suit height of operator. Has

24-inch steel wheel. Price, \$4.25.

No. 4-D Plain Cultivator (Horse)

This very popular tool is strong, plain, simple and does its work to perfection. Has extra high, round-throated hollow steel standards with patent beveled steel teeth, and expanders which makes it an extra stiff tool, yet allow quick adjustment for width. One side may be closed while the other is left open for special work close to the row. Price, \$8.50.
